Dear Mr. [redacted],

About 8 o'clock of the night of April 28th., my wife and a school teacher saw six objects in the sky, not in a group, but singly. A few minutes later after going to my daughter's home, on the next street and corresponding block, she and my daughter and my grandson saw four more. All traveling in the same direction. If you are still interested in flying disks, saucers etc., please let me know and I will write more in full.

Respectfully,
