

Vern Maltais*

A: ...he [the eyewitness] had been coming back from one of his field trips, he'd run onto a flying saucer that had burst open and there were four beings on the ground and that he was surveying the site, archeological group from the University of Pennsylvania, telling us that there were about four or five people with this group.

As they were just starting too look things over really closely, the military moved in and gave them a briefing not to say anything about it and keep quiet and it was in the national interest to get out of there.

Q: What was his feeling about what it was that he had experienced?

A: He had no qualms about what it was. He said it was a vehicle from outer space . There wasn't any question. The beings on there were nothing like, not exactly like human beings...

Q: How did you...

A: ...similar but not exactly.

Q: How did he describe them?

A: He described them being about three and a half to four feet tall, very slim in stature, and with — there heads were hairless, with no eyebrows, no eyelashes, no hair. Sort of a pear-shaped head with the top of the head being smaller — larger, I mean.

Q: Any other characteristics about their appearance?

A: Only one thing that he mentioned. The hands were not covered, they had four fingers.
