Dear sir:

I would like to report a UFO and ask if you could possibly tell me what it was. Here is the time it was spotted. On the night of Sept. 22,1965 at approximately 9:00 P.M. I spotted a UFO. It was in view for about 1 hour and stayed in the same area for at least 1 hour. The object was oval shaped it appeared to have a conning tower on it, but it may have not had one. The object also appeared to be flickering every once and a while, the colors Red, White, and Green. The object moved fast at times and then stood still at others. I myself confirmed that it was not a satilite because it went up,then made impossible turns to the left and right, it also stayed in the same area for a period of time as mentioned above. My friend and I were observing for about 1 hour, then at about 10:00 P.M. that night we were watching with high powered binoculars, and it dissapeared, we did not see it go up,down, or left and right. Then at about 10 minutes later it reapeared and we kept on watching it. Then about 5 minutes later my friend saw a bright red flash,I quickly looked at it but what I saw threw the binoculars, it was just a white disc, I kept on observing it. While I was observing it, it disapeared so quickly I couldn't see which direction it dissapeared into. There was no sight of the UFO after this ocurrence.

I would appreciate it very much if you could identify this object for me or classify it as an Unknown flying object.

Thankyou,
Mr. [redacted]
