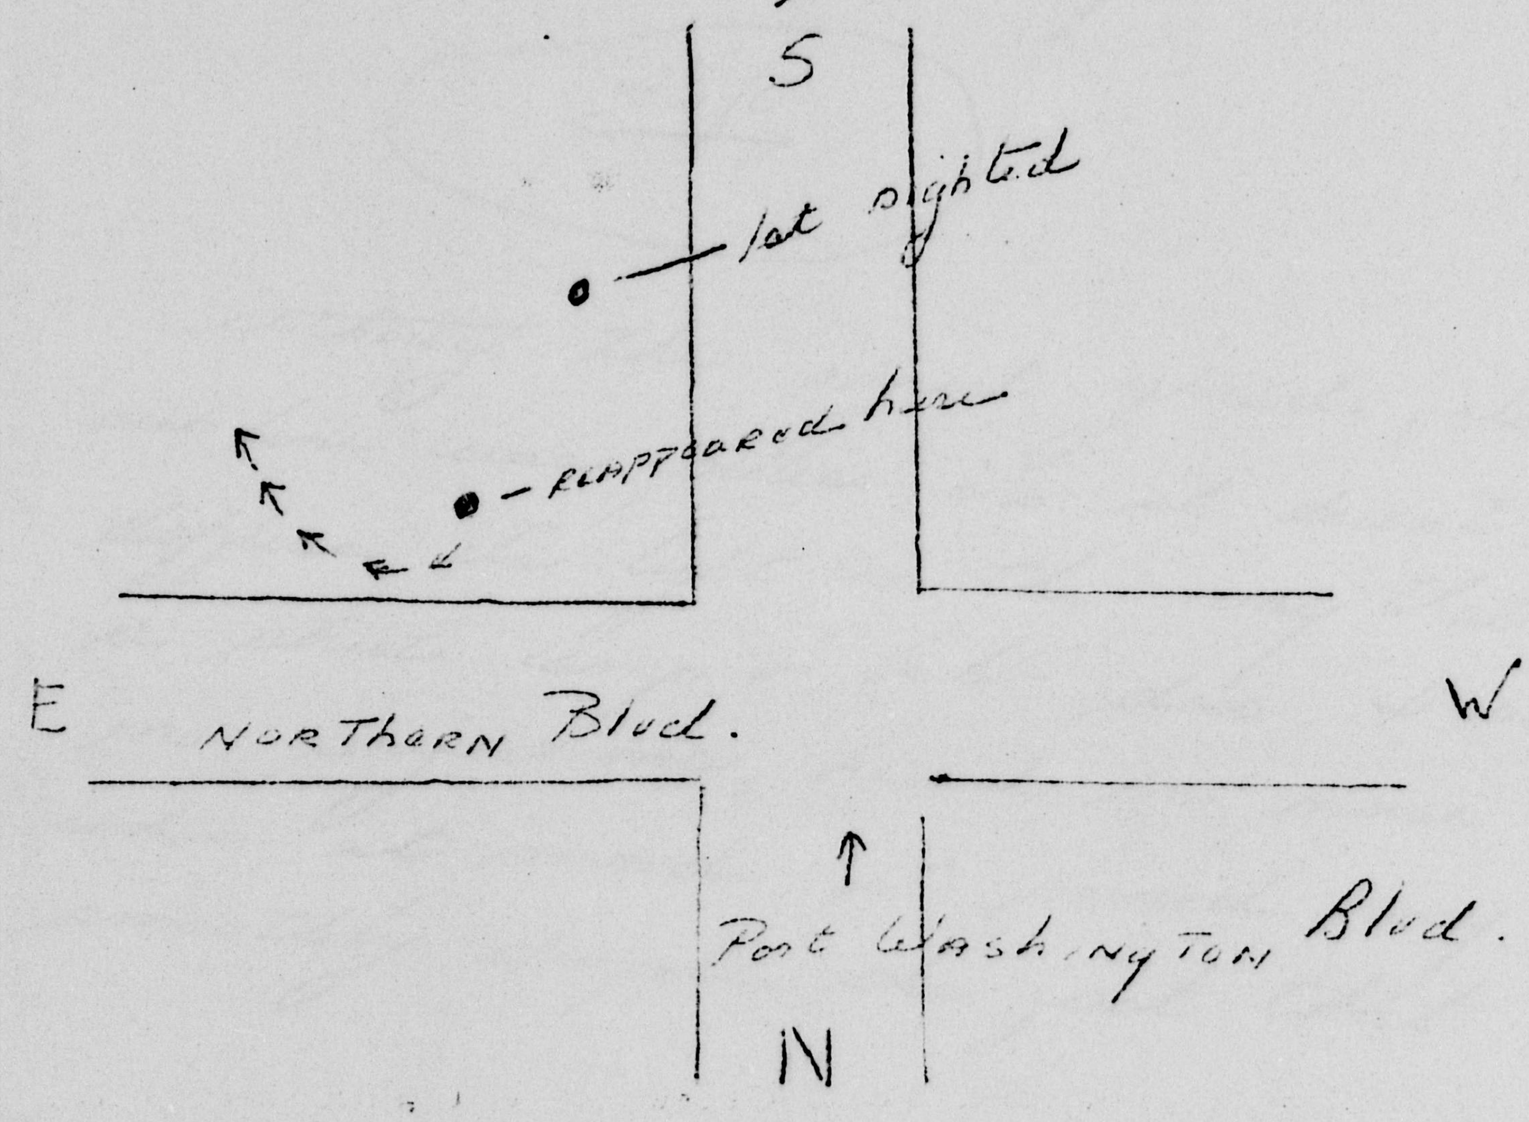
Re: U.F.O.

Dear Sir:

At about 7:25 P.M., Thursday, Nov. 3rd 1966, I was heading south on Port Washington Blvd. in Port Washington. At a point about 200 ft north of the intersection of Port Washington Blvd + Northern Blvd I noticed a stationary glowing object above some tall elms in a heavily wooded residential area which backs up to Northern Blvd. The reason I noticed this light at all was, as I have said, there are many tall trees in the area + normally there are no lights or houses visible from the north side of the boulevard.

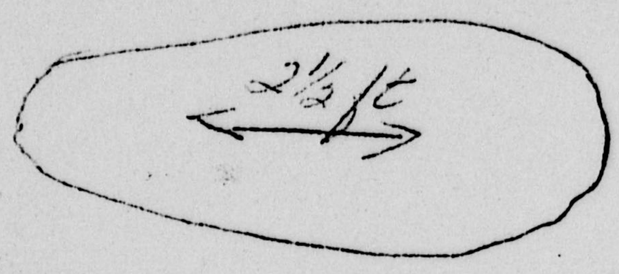
I had to stop at the intersection on a red light & at that point I lost sight of the object. I looked out the side window which I had opened to get a better view, and the object reappeared, about 50 ft in front of me; and at about a height of 40 ft. It moved horizontally and noiselessly in a half circle movement heading south east.



The first light changed green & I had to move on. It was several minutes before I was able to retrace my route and could see nothing.

I saw what appeared to be the side of the object. It had a modified egg shape & was about two to two and half feet long.

It looked something like this.



Although the object glowed, its outline was precise, i.e. it didn't diffuse its light in the way that a street lamp or bulb does. I saw no projections, heard no noise & when it moved, it moved very smoothly despite the fact that

it was a very windy night.

News in the way of bad biography.
I suppose to show You that
I am not prone to seeing things:

1. formerly employed by CIA.
2. flew for PAN AM Airways, during which time I never saw anything "strange".
3. high school teacher.

To date, I have made no report of what I saw but its been weighing on my mind so I put it in Your laps for what its worth.

Thank you.

Sincerely

(Mrs) [redacted]
