10. BRIEF SUMMARY OF SIGHTING

Circular obj, size of full moon, light silver, lower section surrounded by a thin greenish haze. At first obj was motionless, then began slight oscillating motion & increased to great speed & disappeared. Observation at 35 deg elevation.

11. COMMENTS Possibly refraction of moon.with haze giving strange appearance. There are no first mag stars in the general area rpt at that time of night. 35 degree elev rules out mirage as possible because altho indications of refraction or mirage are present. Winds are fm the West ruling out a wind-blown obj. Most plausible explanation is a light reflection of some sort, however there is insufficient data to substantiate this. Case listed unidentified.

AFR 200-2, 5 February 1958

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

An Unidentified Flying Object was observed between 0405/Z and 0415/Z 21 June 1958. It appeared as a circular object of light silver color with a thin greenish haze surrounding the bottom of the object. It was at first motionless then moved at great speed on a course of 360 deg until it faded from sight. Weather at the time of the sighting was clear with good visibility.

It appears at this time that a phenomenon occurred.

k. Wing Intelligence Officer, it appears at this time that a phenomenon occurred

l. None

At that time, the moon was due north, but behind the horizon. It is possible, due to some atmospheric condition, that it might present itself above the horizon, however, the high angle of elevation rules this out. It is odd that although ~~ten~~ ten minutes in sight, no one else reported this phenomena.
