10. BRIEF SUMMARY OF SIGHTING

Bright, white pinpoint of light apparently on luminous red and green oblong object. Body colors flickered. Size and color changed with changes in azimuth.

11. COMMENTS

The colors reported are highly suggestive of running lights used on all a/c. Witness was located in an area crisscrossed by many airways.

Analysis and Conclusions: The witness is located in an area crisscrossed by many airways, and there are many aircraft, both military and civilian, flying over the area at all times. Although there were no acft from the local civil or military fields in the area, it is possible that there was one in the distance from one of the numerous fields in this part of the country. The colors reported are highly suggestive of running lights used on all acft.
