COUNTRY United States	REPORT NO. IR-1-53	(LEAVE BLANK) 01539712
AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT FLYOBREP		
AREA REPORTED ON New York and Pennsylvania	FROM (Agency) Hq 2500th Air Base Wing Mitchel Air Force Base, New York	
DATE OF REPORT 16 February 1953	DATE OF INFORMATION 28 January 1953	EVALUATION F-6
PREPARED BY (Officer) Major James A. Geyer, Deputy for Operations	SOURCE Mr. Lionel Day, Mrs. Dmitry P. Essipoff T/Sgt James C. Smith, S/Sgt James Brand	
REFERENCES (Control number, directive, previous report, etc., as applicable) AFL 200-5, 29 April 1952		

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

The single object was sighted at wide spread locations by five known observers, one of whom was in the vicinity of Upper Darby, Pennsylvania which would indicate that the distance of the object from the four observers on Long Island (the height of the object above the earth's surface) was great enough to be above a tangent extending from the earth's surface at Philadelphia, Pennsylvania, and above normal surface haze which would have obliterated it at the minimum altitude.

Significance: Due to the pre-eminence of Dr. Olivier in the field of meteor study it is felt that his statement that the object was a "bright fireball which is a perfectly normal body" may be accepted as the solution.

APPROVED:

JAMES A. GEYER
Major, USAF
Deputy for Operations

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE	OF	PAGES
Hq 2500th Air Base Wing Mitchel Air Force Base, N.Y.	IR-1-53	2	2	2

1. Description: Single bright object described generally as round, oval or elliptical and with somewhat of a tail. All observers except one gave the color as green and also orange-red. One observer described it as green with an orange tail. None of the observers could accurately describe what they had seen; all of them, however, stated that it was the first object of this nature that they had ever seen. The time of observation, azimuth and elevation of the object were approximately the same for all observers. Only two observers followed the object through a long traverse. The other two saw only a portion of the complete arc. The object was described as traveling at various speeds, all of them in the sonic to supersonic range.

2. Time: All sightings were reported as between 2230 and 2235 hours, EST, 28 January 1953.

3. Manner of Observation: With the naked eye, through eye glasses, window pane or automobile windshield. No aids to vision were utilized.

4. Location of Observers: Two observers, Mitchel AFB, N. Y.
Long. 40° 42', Lat. 73° 38'
One observer, Terryville, Long Island, N. Y.
Long. 40° 56', Lat. 73° 10'
One observer, Lake Ronkonkomo, Long Island, N. Y.
Long. 40° 48', Lat. 73° 10'
One observer, Philadelphia, Pennsylvania
Long. 40° 00', Lat. 75° 15'

5. Information on Observers:
Mr. Lionel Day - Amateur astronomer and amateur radio operator. His descriptions were considered to be accurate.
Mrs. Dmitry P. Essipoff - Elderly housewife who stated during the interview that perhaps her impressions might have been conditioned from material which she has read.
S/Sgt James Brand and T/Sgt James C. Smith are traffic clerks at Operations, Mitchel Air Force Base, New York.

6. Weather: Weather conditions at Mitchel AF Base at the time of the observation had been from broken to scattered cumulus between 4000 to 7000 feet. Further out on Long Island the cloud cover was from lightly scattered to clear.

7. Dr. Charles P. Olivier, Flower Observatory, Upper Darby, Pa., received a report of a sighting at approximately the same time which he accepted as a fireball phenomena.

8. Negative

9. Negative

10. Light commercial traffic in the New York Metropolitan area. No jet traffic.
