17 AISOP FORM 5 FILED

18 May 1955

18 COMMENTS

Due to the likelihood of this sighting being astronomical, since the description of the sighting and the direction and location which the "light" was observed strongly suggests the planet Jupiter, and the improbability of further investigation uncovering additional information over what was received in the preliminary message, no follow-up investigation was authorized by this organization. (4602d AISS)

19 CONCLUSIONS

Possibly astronomicals Planet Jupiter
