13 AISOP FORM 5 2 June 1955		
14 COMMENTS Due to the brevity of sighting (5-10 seconds) and the delay in the receipt of the preliminary report at this Headquarters, no further investigation was authorized. However, from the description of the sighting, it is possible that sighting was caused by observation of a regular type weather balloon at an unusual angle which could account for the impression of tremendous speed.		
15 CONCLUSIONS Possibly balloon.
