14 COMMENTS The sighting has the characteristics of a balloon. The length of sighting, and the winds aloft at the time of sighting seem to bear out this theory. The winds aloft at the time of sighting were blowing the same direction as this object was drifting. See <i>Trackings of MDH-17</i>. <i>Trackings</i> place MDH-17 over area of sighting at approx. time of sighting, substantiating the conclusion below. (RD. 27 Jun 55)

15 CONCLUSIONS Probably Balloon.
