13 AISOP FORM 5		1 27/32
1 June 1955		

## 14 COMMENTS

Due to the delay in receiving the original report and the scant information contained in it, no investigation was authorized. The fact that this object was seen at might and the fact that it could turn at minety degrees indicates the possibility of searchlight activity. The object appeared as a large square glow in the sky, which confirms the possibility of searchlight activity.

15 CONCLUSIONS

Fossibly Searchlight Activity
