AISOP

18 Oct 55

Sgt DeRudder/4498

AISS Log #10

1030 hours

MEMORANDUM FOR RECORD:

1. Telephone conversation between S/Sgt DeRudder, Headquarters, 4602d AISS, and [REDACTED], Cheyenne, Wyoming.

2. The undersigned called [REDACTED] with reference to an unidentified flying object sighted by Mr. White and companion. The following statements and data were obtained from Mr. White:

a. [REDACTED] and companion, [REDACTED], were hunting deer approximately twenty miles west of Cheyenne, Wyoming. At 2014 hours the SOURCE and his companion heard and spotted a commercial airliner passing overhead. The SOURCE was of the opinion that the airliner was circling Cheyenne.

b. While observing the aircraft a noise similar to that of an aircraft during landing attracted the observer's attention and drowned out the noise of the airliner passing overhead. The observer then noted a shadow passing overhead at a very low altitude (50 to 60 feet above observer) which disappeared by passing over a small ridge. [REDACTED] was of the opinion that the object probably struck the ground but he heard no sound other than the noise. [REDACTED] stated that the object was so loud and so close that he and his companion sought shelter in a nearby ravine. Both observers searched the area in which they estimated the object had fallen but with negative results. [REDACTED] stated that they used no artificial light while searching the area.

\* \* c. Driving to Cheyenne to report the sighting, the Source and [REDACTED] were utilizing a spotlight mounted on their car to search for deer. A deer was spotted and the SOURCE and companion stopped their car. Both hunters shot at the deer simultaneously and both men were certain that the animal had been felled by a heart-shot. Source estimated that the deer was at sixty yards distance when shot. After falling, the deer arose and approached the vehicle and hunters. [REDACTED] was certain that the animal was dead immediately after being shot.) At this point the SOURCE stated that both he and his companion fled the scene. Returning in the morning to find the deer, the hunters found no sign of the deer or blood stains.

d. The SOURCE also stated that upon reporting the sighting to CAA personnel in Cheyenne, he was informed that forty-five minutes a similar report had been received from an observer in the same area. The observer of this sighting had purportedly utilized binoculars. [REDACTED] did not know the name of the individual who had reported the earlier sighting.

AI SOP D/F, 18 Oct 55, Subj: Long Distance Telephone Call

e. [REDACTED] stated that he would be available for a personal interview at [REDACTED], Cheyenne, Wyoming, anytime during the day of 19 Oct 55. An interview was scheduled with Mr. White for 1100 hours, 19 Oct 55.

\*\* Denotes material to be held in strict confidence.

Ronald D. DeRudder, S/Sgt, USAF

## I. CONTENTS

PART ONE: Description of sighting by [REDACTED]  
[REDACTED] Cheyenne, Wyoming.

PART TWO: Description of sighting by [REDACTED]  
[REDACTED] Cheyenne, Wyoming.

PART THREE: Supplementary Investigative Efforts.

PART FOUR: COMMENTS of Preparing Officer.

II. SUMMARY: One unidentified flying object sighted six miles west (GeoRef FJAM-0407) of Cheyenne, Wyoming, at 21/0315Z October 1955 (2015MST October 1955). The information contained in this report was obtained from the persons sighting the object and from an investigation conducted to determine the cause of the sighting.

III. INVESTIGATOR: S/SGT RONALD D. DERUDDER, AF 15 494 973

## I. SOURCE: [REDACTED]

Address: [REDACTED] Cheyenne, Wyoming

Age: 23 years

Occupation: [REDACTED]

Education: 12 years

Qualifications: Commercial pilot, 450 hours; Reg AF, 4 years, AP

II. RELIABILITY: SOURCE was extremely cooperative, even profuse in answering the questions of the investigator. [REDACTED] is a qualified commercial airlines pilot and claims thorough knowledge of the configurations and flight characteristics of most aircraft. The description of the sighting obtained telephonically prior to the personal interview was highly exaggerated compared to the description obtained by the personal interview. Upon questioning, the SOURCE gave many conflicting statements of the events of the sighting. The SOURCE tended to emphasize the more spectacular aspects of the sighting and has an overactive imagination. The SOURCE needs and wears very thick eyeglasses, which were not worn at the time of the sighting. SOURCE is considered to be of dubious reliability.

## III. SOURCE'S DESCRIPTION OF SIGHTING:

1. Sunday, 16 October 1955, at 2000 hours, Mountain Standard Time, SOURCE and companion, [REDACTED], were poaching for deer by means of a spotlight mounted on [REDACTED] automobile. SOURCE and companion spotted, shot, and killed a deer. Both men then proceeded up the back road for approximately one-half mile.

2. Returning by foot to the ravine in which the deer was shot (GeoRef FJAM 0407), SOURCE and companion searched for the deer. While searching, [REDACTED] heard a noise similar to that of four (4) turbine type engines, approaching from the east. Mr. White, frightened by the intense noise from the object, jumped into the ravine. From the ravine the SOURCE looked up and saw a large black object outlined sharply against the stars. Although the SOURCE could not ascertain the shape of the object, he stated it was approximately the size of an automobile and 50 to 60 feet over his head. He described the object as being a "dark glob of material with no lights or illumination". [REDACTED] stated that he was of the opinion that the object must have come from over Cheyenne and was heading west at a "tremendous" speed, faster than any jet aircraft he had seen.

3. SOURCE stated that the noise of the object drowned out the sound of a bi-motored aircraft passing overhead.

4. [REDACTED] heard the whining of the object for an estimated ten (10) seconds and saw the object for five (5) seconds. The SOURCE estimated the time to be 2015 hours, 16 October 1955.

5. After the object had passed [REDACTED] searched the area for the deer he had killed but could not find it. SOURCE was emphatic in the belief that the disappearance of the animal was directly attributable to the object he had observed for he was certain he had killed the deer earlier.

## AIR INTELLIGENCE INFORMATION REPORT

|                 |               |      |    |       |
|-----------------|---------------|------|----|-------|
| FROM (Agency)   | REPORT NO.    | PAGE | OF | PAGES |
| Hqs, 4602d AISS | Hqs-UFOB-1-55 | 3    | 7  |       |

I. SOURCE: [REDACTED]

Address: [REDACTED] Cheyenne, Wyoming

Age: 23 years

Occupation: [REDACTED]

Education: 12 years

Qualifications: USMC, 2 years

II. RELIABILITY: SOURCE may be considered unreliable due to many contradictory statements, continual reference to the object as a "flying saucer" and self-admittance to being a "saucer enthusiast". SOURCE stated he knew the characteristics of "saucers" from science fiction literature and comic books. SOURCE continually answered questions, "as [REDACTED] said.....", indicating the amount of influence held by the SOURCE in PART ONE and the influencing factor of talking over the sighting between themselves. SOURCE originally reported that he had seen the object as well as heard the sound of the object but upon questioning stated that he had heard the object only. SOURCE had noted many contrails over the Cheyenne area on the days immediately following his sighting and was certain that this was Air Force B-47 activity hunting the object he had sighted.

### III. SOURCE'S DESCRIPTION OF SIGHTING:

1. SOURCE'S description of the object paralleled that of [REDACTED] with the exception of the following items:

a. SOURCE heard the whining sound of the object for a period of forty-five (45) seconds, but did not see the object.

b. SOURCE glanced at his watch immediately after the object passed overhead and noted that the luminous dial of the watch was glowing brighter than he had ever seen before. SOURCE attributed this phenomenon to radioactivity from the object. SOURCE noted that the time was exactly 2015 hours but stated that his watch might have been five minutes fast or slow.

c. SOURCE stated that the sound of the object, in intensity, was that of four to six B-47 type aircraft on take-off.

## SUPPLEMENTARY INVESTIGATIVE EFFORTS

1. [REDACTED] north-west of the area of the sighting, was interviewed. [REDACTED] stated that he was home reading at the time of the sighting. [REDACTED] further stated that he heard the sound of a high-powered rifle at approximately 2000 hours on 16 October 1955 but had at no time during the evening of 16 October 1955 noticed any unusual flying objects or heard any unusual or loud sounds.
2. [REDACTED], sister-in-law of the above rancher, residing at the same location, heard nothing unusual or saw no unusual objects during the evening of the sighting.
3. A rancher (name withheld), located approximately 200 yards east of the area of the sighting was interviewed. The rancher stated that he had heard nothing unusual during the evening of the sighting, but did state that he heard an aircraft pass overhead between 1930 and 2030 hours on 16 October 1955. The investigator was informed that Union Pacific locomotives passing one and one-half miles south of the location of the sighting sometimes sounded "wierd".
4. Scene of the sighting was visited by the investigator and [REDACTED]. Although the deer shot by [REDACTED] purportedly rolled down a sandy bank of the ravine, no tracks, blood, or markings could be found to substantiate the claim of the SOURCE.
5. Lt. Colonel E.L. Rogers, Deputy Commander of Civil Defense, State of Wyoming, was interviewed. Colonel Rogers stated that the Cheyenne GOC Post was inoperative at the time of the sighting. He also stated that his organization had received no reports of unusual sounds or unidentified flying objects for 16 October 1955. Colonel Rogers suggested that Mr. Boice, an active GOC observer and rancher located two miles north-west of Cheyenne, be contacted. [REDACTED] was contacted and stated that he had heard no unusual sounds or had seen no unusual flying objects during the evening of 16 October 1955.
6. Lt. Miller, Cheyenne Police Department, was interviewed. Lt. Miller stated that no reports of unusual flying objects or sounds had been received by his organization. He further stated that his men on duty outside at the time of the sighting had not reported seeing or hearing anything unusual during the evening of 16 October 1955.
7. A/3C Joseph M. Schroeder, Air Force Police, on guard duty at the East Gate, Warren AFB, Cheyenne, Wyoming, was interviewed. A/3C Schroeder stated that he had neither seen nor heard anything unusual during the evening of 16 October 1955.
8. [REDACTED] for the CHEYENNE EAGLE TRIBUNE, was interviewed. [REDACTED] recipient of the original report from the SOURCES, reiterated the verbal report he received from the SOURCES. The description was comparable to the description given to the investigator with the exception that [REDACTED] had claimed to have seen the object. [REDACTED] stated that he referred the SOURCES to the local Civil Aeronautics Administration (CAA). [REDACTED] also stated that he did not give newspaper coverage to the report because he doubted the veracity of the report.
9. [REDACTED], CAA control tower operator, Cheyenne Municipal Airport, on duty at the time the SOURCES reported the sighting to his organization, was interviewed. Mr. Olsen stated that he interviewed the SOURCES and prepared the original

NOTE: THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, 50 U.S.C. 31 AND 32, AS AMENDED. report. The description of the sighting given to Mr. Olsen by both SOURCES was identical to the description given to the investigator, with the exception that [REDACTED] had claimed to have seen the object.

10. Mr. Robert Baxter, CAA control tower operator, Cheyenne Municipal Airport, on duty at the time the SOURCES reported their sighting, was interviewed. The description given to Mr. Baxter by both SOURCES was very similar to the description given to the investigator with the exception that [REDACTED] had claimed to have seen the object. Mr. Baxter stated that both SOURCES seemed very well composed and that neither SOURCE seemed to be shaken by the sighting or the events surrounding the sighting. [REDACTED], when interviewed telephonically one day prior to the personal interview, seemed to be excited and shaken even though the sighting had taken place a day previous to the phone interview.

11. Mr. Johanson, Stationmaster, Union Pacific Depot, Cheyenne, Wyoming, was interviewed. Mr. Johanson was queried as to the departure and arrival times of any trains on the evening of the sighting. Investigator was informed that train number #7 had departed Cheyenne, heading west, at 2005 hours, 16 October 1955, and had passed approximately one and one-half miles south of the area of the sighting at the time of the sighting. The investigator was referred to Mr. Sherman, Special Agent, Union Pacific Railroad, for further information.

12. Mr. Sherman, Special Agent, Union Pacific Railroad, was interviewed. Mr. Sherman verified the fact that train number #7, engine number 987, passed approximately one and one-half miles south of the area of the sighting at 2020 hours, 16 October 1955. The investigator was further informed that the engine of train number #7 was composed of three units, each unit containing two Diesel-electric engines. Mr. Sherman stated that trains heading west out of Cheyenne are forced to apply full power to negotiate the steep climb to the summit of the mountains west of Cheyenne. It was learned that the sound of six Diesel-electric engines with full power applied would carry for many miles, especially in the mountains and with a wind supporting the sound waves.

14. Mrs. Georgia Bassett, U.S. Weather Bureau, Cheyenne, Wyoming, was interviewed. Investigator was informed that the surface winds in the area of the sighting were from the south south-east at two (2) knots and that the sky was cloudless at the time of the sighting. Ceiling and visibility was unlimited except by darkness.

## COMMENTS of Preparing Officer:

1. The reliability of both observers and therefore the validity of their reports can be deemed "poor".
2. The fact that Mr. Ferguson, located within 300 yards of the sighting, heard the high-powered rifle utilized by [REDACTED] to shoot the deer, but did not hear anything else unusual indicates the absence of an object emitting a sound with the intensity of four to six B-47 type aircraft. Similar statements by other people in the area of the sighting at the time of the sighting substantiate the lack of sound.
3. In view of the above it must be assumed that there was no object emitting a sound as intense as described by the SOURCES.
4. [REDACTED], originally reported that he had seen the object, but then denied that he had seen the object when interviewed by the investigator. [REDACTED], although attributing "tremendous" speed and low altitude to the object was able to see the object by getting a fix on it against the background of stars. Although [REDACTED] stated that the object appeared to be sharply outlined he could not ascertain the shape of the object. [REDACTED] did not wear his eyeglasses at the time of the sighting although he is in definite need of them.
5. In view of the retraction by [REDACTED] that he had seen the object, the discrepancies in [REDACTED] story, and the fact that [REDACTED] was sure that the object had come from over Cheyenne but the investigator could find no one who had seen or heard such an object, leaves great doubt as to whether any object had actually been seen.
6. Information received from Mr. Sherman places a Diesel-electric locomotive, containing six Diesel-electric engines under full power, one and one-half miles south of the area of the sighting at the time of the sighting. Information received from the Cheyenne Weather Bureau indicates that the surface winds from the south south-east would have acted as a sound carrier of "whining" of the Diesel locomotive passing to the south at the time of the sighting. The cool evening air and the topography of the land would tend to accentuate the sound of the locomotive.
7. Both SOURCES described the sound emitted from the object as being similar to a turbine, a sound very similar to that of Diesel-electric engines.
8. A local rancher stated that the Union Pacific trains passing to the south sometimes sounded "wired".
9. In view of the discrepancies in the SOURCES' stories, the fact that both SOURCES have overactive imaginations, and the data and conclusions drawn above, it is herewith submitted that no object actually existed and the sound, being built up in the imaginations of the SOURCES, was in reality that of the Diesel locomotive passing to the south.

  
 WILLIAM A. THRASHER  
 Major, USAF  
 Operations Officer

## COMMENTS of Approving Officer:

Concur with the opinion of the Preparing Officer that no object actually existed and that the sound heard by the SOURCES was that of a Diesel locomotive.
