2045

DATE: Friday September 7, 1956
 TIME OF SIGHTING: quarter of nine at night
 SIZE: The apparent size of Mars at the time
 SHAPE: oval shaped or could have been round
 COMPOSITION: appeared to be wavering at times after going
 SPEED: faster than an airliner or about a jet
 ALTITUDE: lower than clouds
 DIRECTION OF TRAVEL: travelling S.W. made complete circle. ^{note} remark
 MANEUVER PATTERN: straight, complete circle & straight
 COLOR: white and light blue white
 SOUND: there was no sound.
 LENGTH OF TIME OBSERVED: 3 times for five minutes
 SKY CONDITIONS: slightly overcast
 VISIBILITY: excellent
 GROUND DIRECTION OF WIND: don't remember

NAME, AGE, MAILING ADDRESS OF OBSERVER:

17 years of age [REDACTED] Northester 21
Mass

REMARKS: (General description of what you saw) (use back if necessary)

The object came from the northeast came
halving across the sky. There was no
noise at any time. The objd appeared to
stand still but I am not sure. It
then made a complete circle in a
matter of about 10 seconds. It then
continued to the S.W. A few minutes
later we again saw the light
which moved back to the N.E. much
slower. It appeared to be going down

1) a pair of stairs as it came
across the sky. It then went out
of sight behind trees. The object
was about the apparent size of the
planet Mars which was visible
at the time in the Southwest.
There were several witnesses
one was [REDACTED] at the
same address. He is the only
person who wished to have his
name mentioned. At the time
before the object was noted we
were riding bicycles but during
the time we watched the object we
were not on the bike.

Sincerely Yours
[REDACTED]

367

One oval or round white and light bluish white object the size of Mars. Object ~~was~~ travelled at the speed of a jet and flew below the clouds. Object was travelling southwest, made a complete circle and continued southwest. Object was constantly decreasing altitude. Object disappeared behind trees after being viewed for three times at five minutes each.

Object conforms to criteria for a probable aircraft landing at Logan International Airport, Boston, Mass. Decreasing altitude, circling and manner of disappearance support this hypothesis. Evaluation: "Probable aircraft."
