

(245)

Prob Astro:

One round white object, the size of a football at arm's length. Object changed color to dark red and disappeared and reappeared. Object observed at 30 degrees elevation and 45 degrees azimuth. ~~Object seemed about at height of clouds but appear to come. Object was~~ Object was moving south west and appeared at about height of clouds but seemed to come lower. Object was still in sight at time of initial report.

Comments:

~~Opinion~~ of this headquarters believes sighting was probably caused by Planet Venus despite slight inconsistency in azimuth and elevation which can be attributed to ~~both~~ error in human judgment. Temperature inversion accounts for and scattered clouds account for color changes and disappearance and reappearance of object. ~~Indication of a long duration of sighting, and~~ southwesterly movement, time of sighting,

and indication of long duration of sighting
further support ~~Venus~~ hypothesis.
Evaluation of this ~~hypothesis~~ is
"probably astronomical" (Venus).
