STATEMENT OF INTERVIEW WITH ALASKA AIRLINES CREW

January 29, 1987 at 1930 AST

At approximately 1900 on January 29, 1987, I received a call from Anchorage Center Manager, stating that Alaska Airlines Flight No. 53 had reported to Anchorage Center that it had seen a target on their weather radar and asked if the Center had any other aircraft operating in the area. I informed the ARTCC Manager that I would interview the crew at Anchorage International Airport.

I interviewed the crew at Alaska Airlines Operations on January 29, 1987 at approximately 1930 AST. The crew stated that they had departed Nome. Alaska at 1800 enroute to Anchorge. The incident happened approximately 60 miles west of McGrath, Alaska. The aircraft was operating on a heading of East at an altitude of 35,000 feet and an airspeed of Mach .73. The weather was clear and the visibility was unlimited. At approximately 1835 AST the crew noticed a return on the weather radar at their 12 o'clock position and at a range of 25 miles. Both pilots stated that the target was strong and bright. They both looked outside and could not see any lights or targets. Looking back at the radar the target had moved approximately 5 miles further ahead of them to approximately 30 miles. Each sweep of the radar (approximately 1 second) the target would move 5 miles further ahead of them until it went off the radar scope at 50 miles. The captain stated that since the military was having "war games" in the area that it was probably a USAF Aircraft going at a very high rate of speed. He then called Anchorage Center and asked the controller if there was any reported aircraft in the area and reported what he had seen.

The area is not within radar coverage of the Anchorage ARTCC. The controller on duty checked with the USAF (Alaska Air Command) and was told the they did not have aircraft operating in that area at that time.

PERSONNEL STATEMENT

FEDERAL AVIATION ADMINISTRATION Anchorage Air Route Traffic Control Center

February 3, 1987

The following is a report concerning the incident involving Alaska Airlines Flight 53 (AS53) at approximately 40W MCG on January, 30 1987 at 0340 UTC.

My name is Briggs N. Willoughby (BW). I am employed as the Assistant Manager of Automation by the Federal Aviation Administration at the Anchorage Air Route Traffic Control Center (ARTCC), Anchorage, Alaska.

I have reviewed recorded radar data covering the time and location of the reported incident. I found nothing to indicate that an aircraft performing as reported was present.

Briggs N Willoughby

FOR IMMEDIATE RELEASE
February 6, 1987 (REVISED FEB.21,1987)*
#86-06 (#87-09)

UNKNOWN TRAFFIC SIGHTED BY ALASKA AIRLINES CREW ON ONBOARD WEATHER RADAR

The Alaska Airlines flight crew of a Boeing 737 aircraft, flight #53, enroute from Nome to Anchorage, Alaska, on January 29, 1987, reported to the FAA Anchorage Air Route Traffic Control Center, the sighting of unidentified air traffic on their onboard weather radar system. The incident occured at about 6:39 pm, 60 miles west of the community of McGrath, which is approximately 200 miles northwest of Anchorage. The aircraft was flying at 35,000 feet altitude at night, the weather was clear.

Both pilots noticed the target on their weather radar scope and looked to see if there was any "traffic" in front of them. At no time did either crewmember see anything outside the aircraft. The Captain asked the FAA air traffic contoller in Anchorage if there was "any traffic in this-ah-area, do you--headed towards Anchorage?".

The FAA controllers at the air route control center in Anchorage reported a piper navajo at twelve thousand outbound from Anchorage towards McGrath, and a Beech estimated to be over McGrath at 4:04 pm, but nothing else.

The Alaska Airlines Captain responded, "Okay, we're just curious. Up at about our altitude (35,000) ah. headed that direction—thanks—...You haven"t had any UFO reports lately...huh?". The controller responded, "Well I was just getting ready to ask you about that ...ah...could you tell me ...ah...the position of that aircraft."

The area is not within radar coverage of the FAA air route traffic control center. Control of aircraft in the area is done by the center with the use of radio contact. The controller on duty checked with the USAF, Alaskan Air Command, and was told that they did not have military aircraft operating in that area at that time.

-2- ALASKA AIRLINES RADAR SIGHTING, JAN.29, 1987.

The flight crew reported that the target on their radar moved at a very high rate of speed, approximately 5 miles on each sweep of the radar (5 MILES PER SECOND). As the target moved off their radar they changed the range of their radar from 50 miles to 100 miles and saw the target briefly before it became lost in the ground clutter created by the Alaska Range of mountains.

The flight crew was interviewed by FAA inspectors when they landed at Anchorage.

Material developed as a result of this investigation will be released on or about March 5, 1987, in Anchorage, Alaska.
