SYNOPSIS

This report is made in conformity with AFCSI Letter No. 85, dated 12 August 1949, subject: "Special Inquiry, Unconventional Aircraft". In a personal interview with this agent, William Aircraft". In a personal interview with this agent, William Aircraft". In a personal interview with this agent, William Aircraft". In a personal interview with this agent, William Aircraft". In a personal interview with this agent, William Aircraft". In a personal interview with this agent, William Aircraft". In a personal interview with the served four (4) he observed four (4) flying discs, later a fifth appeared, observation was sustained for about 30 minutes. The discs were metallic in composition, steel gray in color, varied in form depending on position at which viewed. Seven power binoculars were used for part of the time. There were four (4) witnesses, (two (2) adults and two (2) children), in addition to expressed interest in contacting Commanding General, AMC, for permission to photograph future phenomena of this type with the object of commercial sale.

UNICE

DETAILS:

- 1. This investigation was conducted in conformity with AFCSI Letter No. 85, dated 12 August 1949, subject: Unconventional Aircraft, "Special Inquiry".
- by this agent on 22 September 1949 at the Federal Building, Los Angeles, Calif. Contact was established with the by means of a telephone call to OSI District Office No. 18 by Warrant Officer LeMASTER in the Los Angeles Communication Center, Room 1418 Federal Building. LeMASTER stated that was in the office relating that he had seen flying discs and desired permission of the military authorities to photograph future sightings of discs with the object of commercial sale. The details set forth below are the observations, comments and estimates of WILLIAM A. except as otherwise indicated.

AT LOS ANGELES, CALIFORNIA

3. Date of sighting:

24 June 1949.

4. Time of sighting:

1545 - 1630 hours.

5. Where sighted (observers position):

From the ground on western outskirts of Mesa, Arizona.

6. Number of objects:

Four (4) initially, later a fifth disc appeared.

7. Observable celestial phenomena or planets that may account for the sighting:

Sighting occurred between the hours 1545 - 1630.

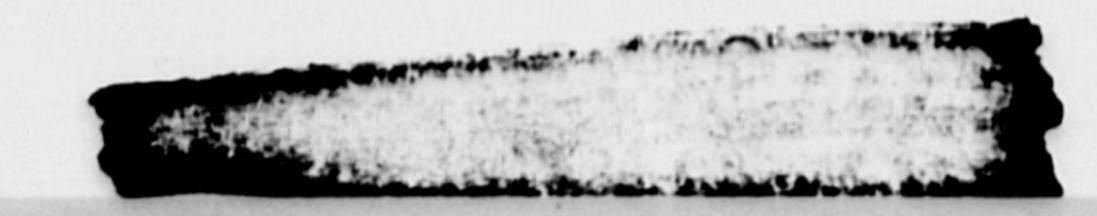

8. Distance of objects from observer:

Distance varied. Initially, the four (4) observed together were approximately 85 degrees above the horizon. Objects appeared to hover around small cloud, estimated to be at an extremely high altitude. The fifth disc, which moved from west to east, was at a lower altitude than the other four (4) but was also extremely high.

9. Time in sight:

Four (4) objects - approximately 30 minutes. Fifth object - about 25 seconds.

File No. 24-185//

27 Sept 1949

10. Appearance of object:

UNCLESTI

- (a) Color Steel gray; reflected sunlight brilliantly; appeared ruby red when viewed from great distance.
- (b) Shape Consisted of two (2) principal parts, a disc supported by two (2) flanges extending around the disc. Appeared rectangular in some positions. The sketches, shown in Inclusures 1 and 2, are reproductions of s rough sketches to show appearance at different distances.
 - (c) Apparent construction Metallic. is definite on this even though flanges were flexible under what appeared to be air pressure.

11. Direction of flight:

After the four (4), hovering near the cloud, had been observed for about 20 minutes, they dispersed. One proceeded in a smooth direct course to the southeast, a second moved straight east, a third went northeast, and the fourth moved upward at about an 82 degree angle. The fifth object, which was not visible at first, appeared in the west and moved eastward.

12. Tactics or maneuvers:

Four (4) were observed to move horizontally, one moved upward at about an 82 degree angle.

13. Evidence of exhaust:

None noted.

14. Effect on clouds:

No effect noted.

15. Lights:

Reflected sunlight brilliantly in some positions. Gave off ruby red light at distance.

16. Support:

The only visible means of support consisted of two flanges or extensions from the inner disc. These flanges partially enveloped the disc.

17. Propulsion:

- (a) Propeller or jet None noted.
- (b) Rotor None noted.
- (c) Aerodynamic vanes Extensions or flanges in front and back of disc could serve as vanes.
 - (d) Visible exhaust or jet openings None noted.

18. Control and stability:

- (a) Fins None noted.
- (b) Stabilizers Conceivably the flanges or extensions from the disc could have served as stabilizers.

19. Air ducts:

The only aperture reported was an opening between the flanges and disc which permitted a view directly through the object at certain positions.

20. Speed:

Speeds varied during the 45 minutes of observation. A maximum of 400 miles per hour was estimated.

21. Sound:

No sound emanating from the objects was heard.

22. Manner of disappearance:

Faded from view.

23. Relative to the observer:

Name: Mande: Address: California

Permanent mailing address: Parizona.

Occupation: Owner of Old Gold Bond Mine at Goldfield, Arizona.

Reliability:

businesslike. In personal appearance he was well dressed and neat. His descriptions were precise; his statements were coherent and consistent. This agent did notice, however, that was inclined to be emotional and his face moved nervously on occasions. It laims his vision is good, although he wears glasses to correct minor defects due to advancing age. He is about 50 years of age.

A check of the records at the University of Southern California reveals that took courses in education, Socialogy and Psychology at that University in the summers of 1923 and 1924. No degree was obtained. These same records also reflect that he later attended the Lawton Business College at Mesa, Arizona. This information confirms a statements concerning his education.

Hobbies — claims to be an amateur astronomer, and to have his own telescope with 9-inch reflector.

UNC

27 Sept 1949

Manner of noting objects:

Observer was changing a tire on his car. Upon wiping perspiration from his forehead, he raised his head slightly and noted the four (4) discs.

Witnesses:

(was an instructor in alreraft gunnery during World War II.)

Supervisor of Water Association, Mesa, Arizona.

Also two (2) children of 1200 age 7 and 9.

DISTRICT OFFICE NO. 17, KIRTLAND AFB, ARIZONA

AT MESA, ARIZONA

Will interview the four (4) persons listed below to determine the accuracy of William account of the flying disc incident, to check on his reliability, and to obtain such other information on the flying discs as they may be able to furnish.

Live P. Mesa, Arizona.

Supervisor of Water Association, Mesa, Arizona.

The two (2) children (aged 7 and 9) of The Control

INCLOSURE 2

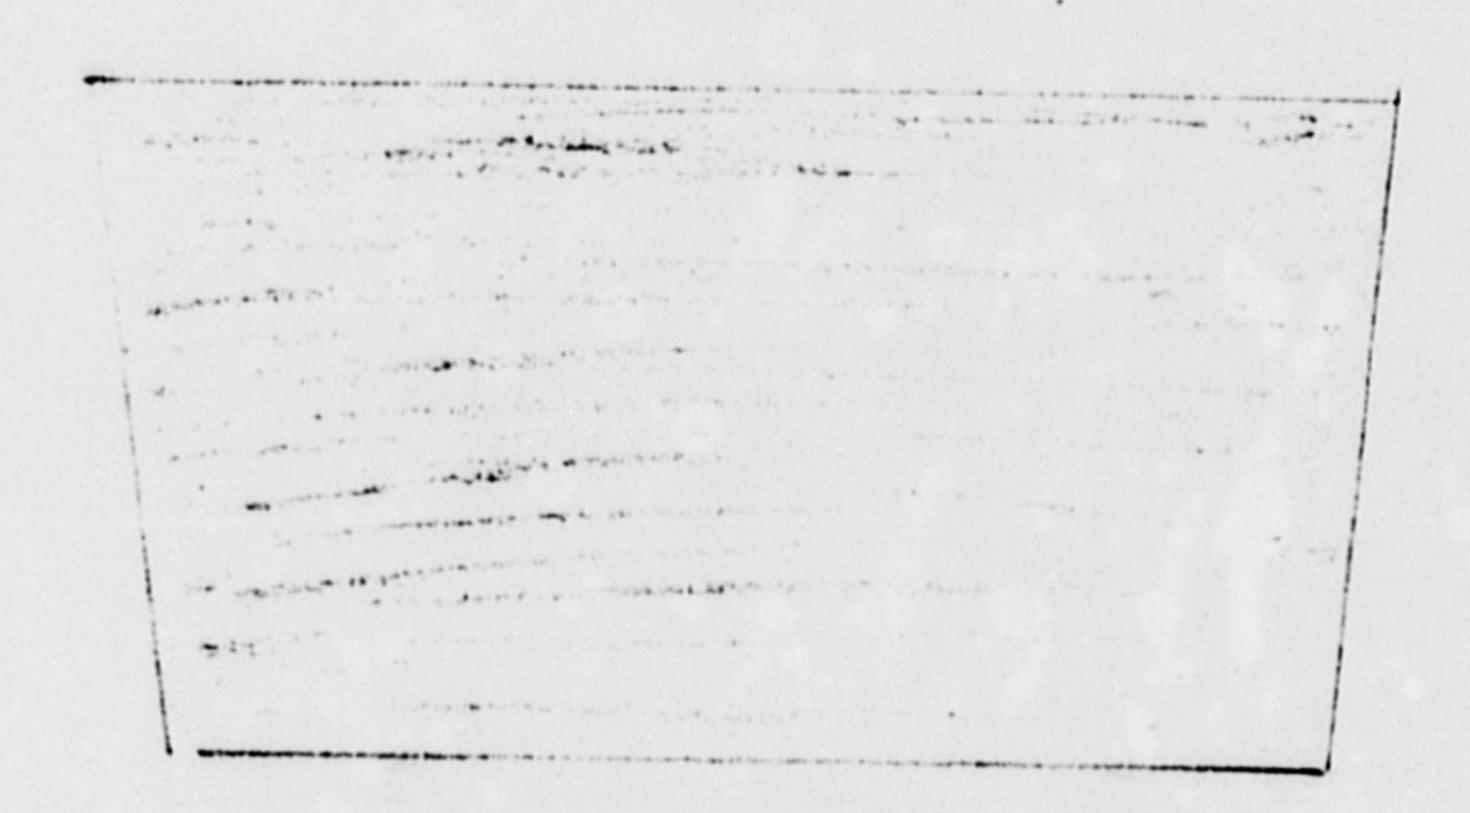

Appeared this shape at times with the flanges occasionally curling back around the inner disc to reveal the form of the disc which remained fixed.

1 1.1

INCLOSURE 1

This shape was noted when object viewed from a very great distance. Appeared ruby red in color. Also appeared this shape on one occasion when disc turned in the air.

AT LUSA, ALLEUM

- . 1. The second of the second on 20 Decomber 1040. Unilimon revocaled that the reason he rejected the sighting of the unconventional aircraft in california instead regarding it here in Arizona was bocause ever; one that hade multion of section strange objects in the sky was considered to be esychopathic cases and Unishold was afraid this would harm is chances of serving on juriou will sessions of court in Arizona. Prior to verifying any of the information Units of lengths determining went to great lengths determining if this agent was an Agent of the Air Force or whether this agent was as le reporter connected with a publication. Still prior to making and statements concerning the Subject of this investigation Call C. informed this Agent that his brother who also saw the objects was an alcoholic and that I was just a little slow mentally and that any thing either one of them said would have to be evaluated, taking into consideration the aforementioned weaknesses. Then are called for but and and only on to verify his statements concerning the unconventional aircrait. all above stated substantially the same: That the objects were sinted 24 June 1949 at 1545 to 1650 hours from their back yard at box 217, ... osc., .rizona. This residence is located in West Lesa, Arizona one and one half bloc.s south of Lain Street which is the north and south dividing line in ...esa, Arizona. All of above stated the same as reported by special with two exceptions. One was that the fifth object which was traveling from west to east remained in sight for exactly twenty-three (25) minutes instead of twenty-five (25) seconds. The other exception was the distance of objects from observers. This distance was judged to be approximately twenty-four (24) miles. During the conversation with the CLIBAUN's an offer was made by har. Manufacture this Agent a working model of the unidentifiable objects.
- 2. Ir. 3 Supervisor of Mater Association, Mosa, Arizona, was interviewed and stated that on 24 June 1949 he was at the Jalbaca's residence and that they were excited about some objects in the air; there were three objects hovering around a small cloud high in the slay; that these objects were at an extreme altitude in the northwest. Two of these objects traveled to the northeast, one to the southwest and then turned to the southeast. They appeared to be of bright aluminium and ould judge that they were approximately the size of a DC-6 aircraft. Fr. Arther stated that it was impossible to determine if they were conventional aircraft or some other objects. Ar. It has been because at that time the objects did not appear to be unusual enough to warrant any undue excitement. Mr. MOOD could not determine the exact size or shape or any other information that would assist in establishing what the unindentified objects were.
- been frightened by their parents so badly that no amount of questioning or conversation could get them to mention anything about the alleged objects. The children's mother and father had threatened them with so much punishment if they spoke about it to anyone that no amount of inducement either UNCLASSIFIE.

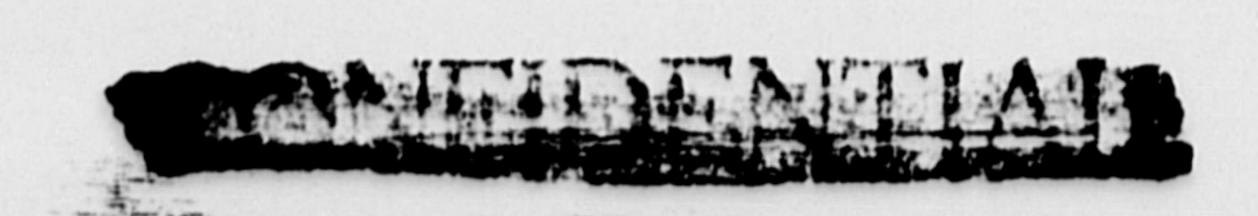

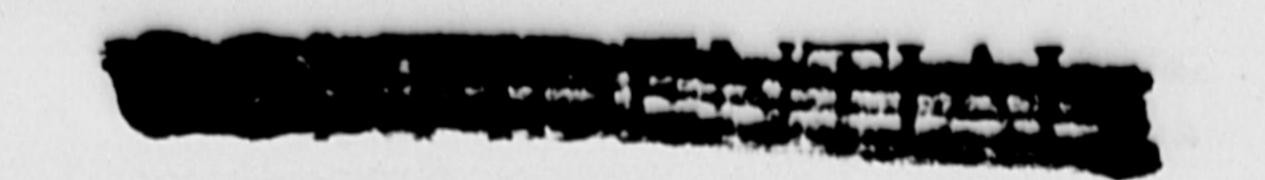

by this Agent or the parents would get them to talk about the alleged objects.

- REFERRED UPON COMPLETION TO THE OFFICE OF ORIGIN -
