4. REPORT OF FINDINGS

- (1) On 1 August 1949, the following article concerning the sighting of unconventional aircraft was published in the Ohio State Journal, Columbus, Ohio:

"'Space Ship' Seen Over East Side"

"The sky over the East Side of Columbus was full of strange stuff last night, according to reports to police, who interested themselves sufficiently to start investigating.

"[redacted] visiting his wife in St. Ann's Hospital, told police he saw a silver 'space ship' with red stripes and portholes hovering overhead between 7:15 and 7:20 p.m."

"Later, [redacted] told police he had seen two 'headlights' in the sky. Pretty soon one light blinked off, then the other he said. The time? Between 7:15 and 7:20 p.m."

(B-6)

- (2) On 1 August 1949, [redacted] motor oiler [redacted] Avenue, Columbus, Ohio, was interviewed, concerning a space ship which he saw in the sky, and stated in substance:

On 31 July 1949, at approximately 1915 hours, I saw an object in the sky, very high, at an altitude of about five thousand feet. The object was due west and was traveling in a westerly direction. The sky was generally clear, but there were small fleecy clouds in the vicinity of the object. The object was oval-shaped, greyish-blue in color and about five times the size of the United States Navy airplane, the "Constitution." I did not see an exhaust trail, and I heard no sounds. When I first saw the object, I called to a [redacted] who was standing on his property at [redacted] talking to his sister, [redacted] Columbus, Ohio, and asked them if they could see the object. As I pointed due west into the sky, they said that they could see the object. As they spoke, two flares appeared to drop from the object. These were circular, and their color was similar

to the white heat from a blast furnace. The flares were approximately the size of an average search or floodlight, and they were illuminated for about one minute. The flares remained stationary, one near the lower right and the other near the lower left of the object. They then turned yellow and were extinguished, first the right and then the left. While the flares had remained stationary under the object the light had formed a haze around the phenomena, making it difficult to see it clearly. When the flares were extinguished a sphere dropped from the object and settled directly underneath it. This sphere was a brilliant white and about one-fifth the size of the setting sun. The object and sphere then appeared to rise and both disappeared into the clouds. I can recall nothing further concerning this incident. (C-3)

such a tone that other employees could hear his answers. [redacted] apparently was making the most of the occasion. It is the opinion of the undersigned that Boye's answers were too glib, and he answered without any hesitation or thought.

(3) On 1 August 1949, [redacted], machinist, [redacted] Columbus, Ohio, was interviewed concerning an unidentified object he saw in the sky, and stated in substance:

At approximately 1915 hours, 31 July 1949, [redacted] Columbus, Ohio, called to me and asked if I could see a strange object in the sky. I looked to where he was pointing, due west, and I saw two objects or lights. I cannot judge distance in the heavens, but the objects were very high. They were round, and approximately the size of floodlights and gave out a brilliant light similar to white hot or molten metal. The sky was generally clear, but there were some clouds in the west. The objects or lights were traveling slowly in a southerly direction. I heard no sound and did not see any exhaust trail or evidence of locomotion. I have no further information concerning this phenomenon. (B-6)

Agent's Note: Informant Walker gave his information in a sincere straightforward manner, with no apparent exaggeration. He stated that informant [redacted], who was unknown to him previously, had called at his home at 2200 hours to have [redacted] corroborate, for a police report, his [redacted] discovery of the objects earlier in the evening. While waiting for the police to arrive, [redacted] told Walker that he had studied science and astronomy as a hobby, was interested in all current events, and had read many scientific fictional and non-fictional books. [redacted] further stated to the undersigned that [redacted] appeared slightly imaginative and acted peculiarly. [redacted] had informed Walker that he had no sleep Saturday night because of worry over his wife and new-born baby.
