UNITED STATES AIR FORCE THE INSPECTOR GENERAL OFFICE OF SPECIAL INVESTIGATIONS REPORT OF INVESTIGATION		FILE NO. 24-38	DATE 6 Sept 49
TITLE SIGHTING OF UNCONVENTIONAL AIRCRAFT AT DENVER, COLORADO on 20 AUGUST 49 BY MR. [REDACTED]		REPORT MADE BY WILLIAM E. HENDRIX, S/A	dl
		REPORT MADE AT DO #14, LOWRY AF BASE	
		PERIOD 29 August 1949	
		OFFICE OF ORIGIN DO #14, LOWRY AF BASE	
		STATUS CLOSED	
CHARACTER SPECIAL INQUIRY - INCONVENTIONAL AIRCRAFT			
REFERENCE None - This is an initial report			
SYNOPSIS Information received from Air Intelligence Report, No. LAFB 000.9.3 Lowry AF Base, dated 26 August 1949 reflects that on 20 August 49 Mr. [REDACTED] reported having seen an object in the vicinity of southwest Denver, which he thought might be a "flying disc". Observation was made by [REDACTED] Street, Denver, at 1630 MT on 20 August 49. Object was reported heading 260 degrees west, altitude 40,000 ft., speed 1700 M.P.H. and was shaped similar to a flying wing with heat waves emanating from the trailing edge, giving the appearance of being oval in shape. Object was estimated to be about the size of a B-26 and was the color of aluminum. Object's angle of elevation was approximately 85 degrees and was in view for approximately twenty (20) seconds. No witnesses to this observation were located other than MAHONEY. No investigation was conducted by District Office 14 concerning this matter. DOWNGRADED AT 3 YEAR INTERVALS: DECLASSIFIED AFTER 12 YEARS. DOD DIR 5200.10

DETAILS:

UNCLASSIFIED

AT DENVER, COLORADO

1. Information appearing in this report does not reflect investigation conducted by DO #14, OSI, Lowry AF Base, but is taken verbatim from an Air Intelligence Information Report, No. LAFB, 000.9-3, Hq 3415th Tech Tng Wing, Lowry AF Base, Denver, Colorado, dated 26 August 1949. This report indicates that the investigation was conducted by E. T. MURTHA, Captain, USAF, Wing Intelligence Officer and covers period from 20-26 August 1949.

2. The report is as follows:

"1. Date of sighting: Saturday, 20 August 1949

2. Time of sighting: 2330Z

3. Where sighted (observer's position), [REDACTED],
Denver, Colo.

a. Ground

(1) City, town: Denver, Colorado

(2) Distance and direction from city or town, road, intersection, etc.: Heading West, 260 degrees

(3) From building (story), yard, etc.: Yard.

(4) Map coordinates (if feasible) showing latitude and longitude: Not determined.

b. Air: Not applicable.

c. Sea: Not applicable.

4. Number of objects: One. appeared oval because of fumes.

5. Observable celestial phenomena or planets that may account for the sighting: Bright sunny day.

6. Distance of object from observer.

a. Laterally - approximately 10 miles.

b. Angle of elevation from horizon: 85 degrees

c. Altitude: 40,000 feet

7. Time in sight: 20 seconds.

8. Appearance of object:

a. Color: Aluminum

b. Shape:

c. Apparent construction: Possibly aluminum

d. Size: 85 feet across

(1) Estimated size: 85 feet across

(2) Size as it appeared from observer's view: Size of B-26

9. Direction of flight: West - 260 degrees

10. Tactics or maneuvers: Straight line of flight, horizontal

[REDACTED]
UNCLASSIFIED

DETAILS (cont'd)

11. Evidence of exhaust.

UNCLASSIFIED

- a. Color of smoke: Undetermined.
- b. Length and width: heat vapor-fuzzy.
- c. Odor (if any): None.
- d. Rate of evaporation: Immediately
- e. Does trail vary with sound?: Not applicable

12. Effect on clouds: Not applicable - clear.

13. Lights: None

14. Support: Wings. Object appeared to have a swept back flying wing. The trailing edge of the wing emitted a fuzzy heat wave which gave the object an oval shaped appearance.

15. Propulsion: Probably jet propelled.

16. Control and stability: Not observed.

17. Air ducts: Not observed.

18. Speed - M.P.H.: 1700

19. Sound: Distance too great for sound to be heard.

20. Manner of disappearance: Faded from view

Relative to the Observer

1. Name of observer: [REDACTED]

2. Address: [REDACTED] Street, Denver, Colorado

3. Occupation: [REDACTED]
Training, Lowry AFB, Denver, Colorado

4. Place of business:

a. Name of employer: Lowry Air Force Base

5. Pertinent hobbies: Archaeology - chess.

a. Is observer amateur astronomer, pilot, engineer, etc.: 54 months USAF former Armament Officer, [REDACTED]

6. Ability to determine:

a. Color.

b. Speed of moving objects.

c. Size at distance.

)Witness is a former Armament
)Officer, thoroughly familiar
)with conventional type of
)American aircraft and is [REDACTED]
)[REDACTED] at Lowry AFB.
)It is felt that this witness is
)amply qualified to determining
)information requested in a.b. &c.

7. Reliability of observer: Fellow workers report Mr. Mahoney, is conscientious and reliable.

8. Notes relative of observer on:

a. Sightings in general: Not applicable.

b. How attention was drawn to object: Motion

UNCLASSIFIED

UNCLASSIFIED

- c. Degree of fatigue and duration of flight at time of sighting in cases where observer is airborne: Not applicable.

9. Witnesses: None
10. Comments of interrogator regarding the intelligence and character of person interrogated: Witness was the quiet, sober type and appeared to be sincere. This Intelligence Officer, after considering the witness' background and experience and apparent sincerity, believes there is a possibility of truth in his statements.

Relative to Radar Sightings

1. Radar equipment of the Denver Bomb Flot was not in operation on 20 August 1949. Radar observation with APQ/13 were made at 1500 and 1700. Nothing unusual was reported.

General

1. Teletype sequences of local weather conditions: (For Lowry AFB and U.S. Weather Station, Stapleton Field, Denver, Colorado, attached to report of Lowry AFB Weather Officer.
2. Winds aloft report:
 - a. Activities of Det 19-3L, 19th Weather Squadron attached to Lowry AFB, is as follows:
 - (1) Surface observations (teletype sequences) indicate scattered cumulus type clouds at 7000 to 8000 feet and an occasional thunderstorm were prevalent in the Denver area. Visibility was excellent with no obstructions. (Copy of weather report attached).
 - (2) Upper Air Observation consisting of radio set SCR-658 tracking transmitter attached to a balloon was conducted from 1415 to 1442 when run was terminated due to fading signal. Set was operated on 403 megacycles with some interference. Cause of interference was undetermined. Copy upper wind report (RAWIN) attached.
 - (3) Radar observations with APQ/13 were made at 1500 and 1700. Each report lasted approximately 20 minutes and nothing unusual was reported.
 - b. Activities of U. S. Weather Bureau weather station at Stapleton Field, Denver, Colorado:
 - (1) Surface observations (teletype sequences) indicate scattered cumulus clouds in the general area with visibility unlimited. Copy of reports attached.
 - (2) Upper air observation consisted of tracking of a weather balloon through optical means(theodolite) from 1400 to 1433. Run was terminated when balloon burst. (A white balloon was used.) Copy of report (PIBAL) attached.

UNCLASSIFIED

UNCLASSIFIED

DETAILS (cont'd)

- c. Activities of Air National Guard at Buckley Field, Colorado:
None
 - d. Activities of Naval Weather Section at Buckley Field, Colorado:
 - (1) Surface observations indicate scattered cumulus clouds in the area with excellent visibility.
 - e. Analysis of weather at 1630M is: Scattered cumulus type clouds bases variable 8000 to 10000 feet, visibility 30 miles or more, winds aloft 15000 feet 300 degrees 18 knots becoming 330 degrees 33 knots.
3. Local flight schedules: See flight schedules of Lowry Air Force Base and Stapleton Airport, attached.
4. Possible releases of testing devices, etc.: Negative
5. 6., 7., 8., 9., & 10: Negative."
3. Copies of the attachments mentioned in the above report have been made and are being attached to this report as inclosures.

AIR INTELLIGENCE INFORMATION REPORT			
SUBJECT Unconventional Aircraft - "Flying Disc"			
AREA REPORTED ON Denver, Colorado		FROM (Agency) Hq 3415th TT Wg., Lowry AFB, Denver, Colo.	
DATE OF REPORT 26 August 1949	DATE OF INFORMATION 20 August 1949	EVALUATION B-3	
PREPARED BY (Officer) E. T. MURTHA, Capt. USAF, Wing Intel. O.		SOURCE Eye Witness - Theodore Q. Mahoney	
REFERENCES (Control number, directive, previous report, etc., as applicable) TT LUGB 5586, Hq 3415th TT Wg, Lowry AFB, Denver, Colo., 25 Aug 49			
SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 118—Part II.)			
1. Mr. [REDACTED] at Lowry Air Force Base, Denver, Colo., reported an object in the vicinity of southwest Denver which he thought might be a "flying disc". Observation was made in Mr. [REDACTED] backyard at [REDACTED] Street, Denver, at 1630 MT, 20 August 1949. No witnesses were collected. Object was reported at an altitude of 40,000 feet, traveling west on a 260 degree heading. Object maintained level flight and faded from view in approximately twenty seconds. Estimated speed of object was 1700 miles per hour. Object was shaped similar to flying wing with heat waves emanating from trailing edge, giving the object an oval shaped appearance. Mr. [REDACTED], who is a former Armament Officer, and who is well acquainted with the conventional types of aircraft, estimated the diameter of this object to be approximately the same as a B-26, or 85 feet. When sighted, the angle of elevation was approximately 85 degrees. The color and construction of the material was similar to aluminum. Mr. [REDACTED] stated the object was probably jet propelled. 2. Weather at 1630 MT was scattered cumulus type clouds bases variable 8000 to 10,000 feet, visibility 30 miles or more, winds aloft 15,000 feet 300 degrees 18 knots becoming 330 degrees 33 knots. There was no outstanding or prominent celestial phenomena. Upper Air Observation consisting of radio set SCR-658 tracking transmitter attached to a balloon was conducted from 1415 to 1442, when run was terminated due to fading signal. Set was operated on 403 megacycles with some interference. Cause of interference was undetermined. Radar observation with APQ/13 were made at 1500 and 1700. Nothing unusual was reported. 3. U. S. Weather Bureau weather station at Stapleton Field, Denver, Colorado, made upper air observation consisting of tracking of a weather balloon through optical means from 1400 to 1433. Run was terminated when balloon burst.

---	----------------------------	-------------------

PART II - REQUIREMENTS

General

1. Date of sighting: Saturday, 20 August 1949.
2. Time of sighting: 2330Z
3. Where sighted (observer's position): 2801 W. Dartmouth Street, Denver, Colo.
 - a. Ground
 - (1) City, town: Denver, Colorado
 - (2) Distance and direction from city or town, road, intersection, etc.: Heading West, 260 degrees.
 - (3) From building (story), yard, etc.: Yard.
 - (4) Map coordinates (if feasible) showing latitude and longitude: Not determined.
 - b. Air: Not applicable.
 - c. Sea: Not applicable.
4. Number of objects: One. Appeared oval because of fumes.
5. Observable celestial phenomena or planets that may account for the sighting: Bright sunny day.
6. Distance of object from observer.
 - a. Laterally - approximately 10 miles.
 - b. Angle of elevation from horizon: 85 degrees.
 - c. Altitude: 40,000 feet.
7. Time in sight: 20 seconds.
8. Appearance of object:
 - a. Color: Aluminum
 - b. Shape: 
 - c. Apparent construction: Possibly aluminum.
 - d. Size: 85 feet across.
 - (1) Estimated size: 85 feet across.
 - (2) Size as it appeared from observer's view: Size of B-26.

9. Direction of flight: West - 260 degrees.
10. Tactics or maneuvers: Straight line of flight, horizontal.
11. Evidence of exhaust.
 - a. Color of smoke: Undetermined.
 - b. Length and width: heat vapor - fuzzy.
 - c. Odor (if any): None.
 - d. Rate of evaporation: Immediately.
 - e. Does trail vary with sound?: Not applicable.
12. Effect on clouds: Not applicable - clear.
13. Lights: None.
14. Support: Wings. Object appeared to have a swept back flying wing. The trailing edge of the wing emitted a fuzzy heat wave which gave the object an oval shaped appearance.
15. Propulsion: Probably jet propelled.
16. Control and stability: Not observed.
17. Air ducts: Not observed.
18. Speed - M.P.H.: 1700.
19. Sound: Distance too great for sound to be heard.
20. Manner of disappearance: Faded from view.

Relative to the Observer

1. Name of observer: [REDACTED]
2. Address: [REDACTED] Denver, Colorado.
3. Occupation: [REDACTED]
Denver, Colorado.
4. Place of business:
 - a. Name of employer: Lowry Air Force Base

SUBJECT: Investigation of Meteorological Activities in Vicinity of
Denver, Colorado, on Evening of 20 August 1949

TO: Commanding General
Lowry Air Force Base
Denver, Colorado
ATTN: Wing Intelligence Officer

1. An investigation of all upper air and radar activities of weather agencies at or adjacent to Lowry Air Force Base, Denver, Colorado, was conducted by the undersigned on this date. Results by organization follow:

a. Activities of Det 19-3L, 19th Weather Squadron:

- (1) Surface observations (teletype sequences) indicate scattered cumulus type clouds at 7000 to 8000 feet and an occasional thunderstorms were prevalent in the Denver area. Visibility was excellent with no obstructions. (copy of weather report attached).
- (2) Upper Air Observation consisting of radio set SCR-658 tracking transmitter attached to a balloon was conducted from 1415 to 1442 when run was terminated due to fading signal. Set was operated on 403 megacycles with some interference. Cause of interference was undetermined. Copy upper wind report (RAWIN) attached.
- (3) Radar observations with APQ/13 were made at 1500 and 1700. Each report lasted approximately 20 minutes and nothing unusual was reported.

b. Activities of U.S. Weather Bureau weather station at Stapleton Field, Denver, Colorado:

- (1) Surface observations (teletype sequences) indicate scattered cumulus clouds in the general area with visibility unlimited. Copy or reports attached.
- (2) Upper air observation consisted of tracking of a weather balloon through optical means (theodolite) from 1400 to 1433. Run was terminated when balloon burst. (A white balloon was used.) Copy of report (PIBAL) attached.
