Streaks in Sky Mystify Middle Tennessee Observers

Middle Tennesseans had their peaceful Sunday mildly disrupted yesterday with the late afternoon appearance of an elongated species of "flying saucer."

From Cookeville, Livingston, and Buffalo Valley, all the way to Nashville, farm and town folk craned their necks and speculated upon two odd streaks of light that appeared in the sky shortly before 6 p.m., moving to the Southwest.

Some said the flame colored streaks were rockets. Others thought they marked the trail of a pair of jet-planes. The more imaginative spoke of "flying saucers" and such. Skeptics said the sky was just playing tricks, that it was the reflection of the sun on cumulus cloud formations.

At any rate it wasn't an optical illusion. Hundreds of people stood in the streets at Cookeville

and neighboring towns to watch. Among them was Everett Derryberry, president of Tennessee Polytechnic institute, who was stumped like the rest.

Uniformly the heavenly phenomenon was described as follows:

Two orange-hued parallel lines of light, moving slowly (or maybe so high it just seemed slow) in a southwesterly direction.

Berry field weathermen could offer no precise explanation, but they weren't excited. "Probably reflection," they said.

Witnesses at THE NASHVILLE TENNESSEAN said the streaks were at a great height and at a great distance. They settled on the jet-plane explanation.

Among those who saw the show, one sentiment seemed to prevail—"In this day and time, brother, anything might happen."

Fire Balls Are Seen In Tennessee Skies

NASHVILLE, Sept. 17.—(UP)—Residents here and at Cookeville more than 50 miles to the east reported seeing "bright orange streaks" or "balls of fire" in the sky shortly before dark Sunday night.

Joe Mabry, manager of Radio Station WHUB at Cookeville, said he saw two parallel streaks traveling slowly southwestward and visible for about 10 minutes.

Mabry said more than a dozen persons telephoned his station to report seeing the streaks and to inquire about them. Among the callers, he said, was Everette Derryberry, president of Tennessee Tech.
