SPOT INTELLIGENCE REPORT

SUBJECT: Flying Discs
Chicago, Northwest Side
2200 Hours, 19 July 1952

TO: Director of Special Investigations
Headquarters United States Air Force
Washington 25, D. C.

1. SYNOPSIS: Flying discs seen by resident of Chicago about 2200 hours, 19 July 1952.
2. DETAILS: This office has been advised by the Federal Bureau of Investigation, Chicago, that on 19 July 1952, Mrs. [REDACTED] Chicago, advised that agency that she had seen what she believed to be flying discs at 2200 hours on 19 July 1952, while in the vicinity of Balmoral and Ashland Avenue. Mrs. [REDACTED] stated that she had observed these objects toward the west and that they appeared to be round. According to Mrs. [REDACTED] they were not in any formation but were independently darting about in the sky, first on a horizontal plane and then on a vertical plane. There were approximately six (6) of these objects, and they moved quickly, and there appeared to be no pattern for their movement. Mrs. [REDACTED] stated that they appeared to be quite large in size, being larger than stars but not quite the size of the moon.
3. ACTION: Two (2) copies of this report being transmitted direct to the Commanding General, Air Materiel Command, Wright-Patterson Air Force Base, Dayton, Ohio, Attention: NCIS, in compliance with current instructions.

DOWNGRADED AT 3 YEAR INTERVALS
DECLASSIFIED AFTER 18 YEARS.

SPOT INTELLIGENCE REPORT

SUBJECT: Flying Discs
Yarmouth Harbor, Nova Scotia
1830 Hours, 17 July 1952

TO: Director of Special Investigations
Headquarters United States Air Force
Washington 25, D. C.

1. SYNOPSIS: Seven (7) flying discs seen by individual vacationing in Nova Scotia about 1830 hours, 17 July 1952.

2. DETAILS: This office has been advised by the Federal Bureau of Investigation, Chicago, that on 25 July 1952, Mrs. [REDACTED] [REDACTED] Road, Chicago, informed that agency that while vacationing in Nova Scotia she had observed what she believed to be seven (7) flying discs in the vicinity of Yarmouth Harbor on 17 July 1952, at approximately 1830 hours.

a. Mrs. [REDACTED] advised that at the time she sighted these objects, she was leaving Yarmouth Harbor aboard the SS Yarmouth and was standing near the bow looking toward a point of land extending out into the sea. She stated that the objects were silvery in color and were divided into two (2) groups, four (4) of them being what she described half circles and three (3) full circles. The half circles were arranged in a perpendicular formation with their flat sides down. She could not recall whether they were touching or not. The full circles were near the half circles and slightly to their right and were arranged in an inverted triangular formation with two (2) of the circles above and one (1) below at the point of the triangle. The circles were separated by approximately one (1) diameter. She stated that she first sighted these objects over the point of land described above but that she could not estimate the distance from her. She added that these objects hovered

momentarily in the air, then flickering slightly but retaining their relative position to each other as if they were part of a "picture", they slowly descended. She added that she did not know whether they suddenly disappeared above the land or whether they sank beyond the point into the sea but that when they were close to the horizon, they disappeared.

b. Mrs. [REDACTED] stated that the discs seemed highly polished and silvery in color and seemed to reflect the rays of the sun, which was a short ways above the horizon directly out to sea. She added that these objects had a distinct shape and that she could see them clearly. She estimated the period during which she observed them to be of about two (2) minutes duration and stated that all of these objects disappeared at the same time.

c. Mrs. [REDACTED] described the day as being bright and clear and added that she could not recall there being any clouds in the sky. She added that it being mid-summer, the day was quite bright at that hour.

d. Mrs. [REDACTED] prepared a diagram showing her position and that of the discs at the time she sighted them and also the position of the sun in relation to herself and the above objects.

3. ACTION: Two (2) copies of this report, with inclosure indicated in paragraph 2 d above, being transmitted direct to the Commanding General, Air Materiel Command, Wright-Patterson Air Force Base, Dayton, Ohio, Attention: MCIS, in compliance with current instructions.
