SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112 - Part II.) At approximately 0130 hours, 6 September 1952, T/Sgt [REDACTED] sighted an object like a bright star. The object was round in form and brighter than a star and moved around in a circle from a definite area. It appeared to rise and drop, it set still for an unknown length of time and then would move very fast to the left or to the right not always in a straight line. On the same night and at the same time the object was observed by A/1C [REDACTED], and A/2C [REDACTED]. Both Airmen confirmed T/Sgt [REDACTED] statement. At approximately 0230 hours, 7 September 1952, T/Sgt [REDACTED] again sighted the same or like object in approximately the same area. It appeared to move faster and cover a larger area than it did on 6 September 1952.
