SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

Following unusual scope presentation is forwarded for information only and is not evaluated by this headquarters.

1. Description of Object: On two separate outbound tracks from Itazuke AFB a series of targets appeared directly behind the aircraft when entering an azimuth of 050° to 070°, in relation to Tsutsu Saki (WJKE 1007). Objects appeared as a normal aircraft, but rounder in shape with a trace and trailed approximately two to three miles to rear of aircraft.
2. Time of Sighting: 2035, 2041, 2050, 2052, 2156 and 2209 (All times Item). Each for a duration of two to four sweeps.
3. Manner of Observation: Radar scope presentation. TPS-1B plan 12 and 7.
4. Location of Observer: Tsutsu Saki (WJKE 1007). These objects appeared when aircraft passed between WJKE 2518 and WJKE 2018 at an azimuth of 050° to 070° disappearing completely in two to four sweeps with no directional or air speed indication.
5. Identifying Information of Observers: A/3c Carlton L. Hall and A/2c Warren D. Groverstein. Reliability of these two airmen is very good. A/3c Hall was assigned 24 June 1952 and A/2c Groverstein on 21 April 1952.
6. Weather: The weather was reported as CAVU, scattered clouds.
7. Other Activity that Might Account for Sighting: None
8. Physical Evidence: None
9. Interception: None
10. Air Traffic: Five different aircraft flying Amber 2.

---	----------------------------	---------------------------------

At 2035I 28 Sep 52 I was scope operator for this detachment. A outbound track from Itazuke AFB on entering the area 050 to 070 had a series of targets appear behind the main target. Another outbound track at 2041I showed this same condition. I called A/2c Grovenstein to the scope and a target at 2052I did the same thing. I left A/2c Grovenstein at the scope and went to report the occurrence to the Detachment Commander and ADCC. The scope was normal with little clutter. Two tracks during this time went thru the same area and did not show this condition.

CARLTON L. HALL
A/3c, USAF, AF 13349423

At approximately 2050I on the 28 Sep 52 A/3c Hall called me into the scope room to see a unusual radar condition. At 2052I a target outbound from Itazuke had three targets appear behind it at an azimuth of 055. For about 10 sweeps this condition remained and then disappeared. At 2156I and 2209I this occurred again. Several tracks in between did not show this occurrence. Scope was normal with minor sea clutter and usual PE.

description*

23. In the following sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it.

24. Draw a picture that will show the motion that the object made. Place an "A" at the beginning of its path and a "B" at the end of its path.

Looking North
while object
moved in Northerly
or Northwesterly
course.

The object was not
in descent as this
drawing suggests...
rather it shows its
Northerly course.

25. Draw a picture that will show the shape of the object. Label and include in your sketch any details of the object that you saw and place an arrow beside the drawing to show the direction the object was moving.

Shape: squat boat-shaped or lemon-shaped
Front: acuminate
Rear: slightly tapered; tip blunted and
amorphous.
Body: corrugated or ribbed, which seemed
to emanate stronger bluish glow.

Note: See page 8 for performance
and disappearance.

30. Please add here any further comments which you believe are important.
Use additional sheets of the same size paper, if necessary.

Question #20: The altitude I judged roughly to be at first:
50 to 75 miles. However, the object could
have been considerably lower than this estimate.

The speed was visually, very slow. I am
reasonably sure it moved forward no more
than two half-dollar lengths which required
a full minute.

The estimated size of the object: a half
dollar coin, held at arm's length. The object
impressed me as being tremendous in size,
possibly more than 1500 ft. in length: 1000 ft in
width.

Question #18: ~~While object moved forward, the body rolled or~~
listed. Completing this performance, its front portion
passed through, or behind what seemed an
invisible "curtain" - a region of space that
swallowed up the entire lighted mass. As the
object passed thru this curtain, the visible portion
of the ellipsoidal contour remained constant and
stabilized.

REMARKS: No meteors or aircraft were observed during the night. No balloons
were in the area according to Control Tower at Lunken Airport.
The object appeared self-luminous. The sun had not risen
to cause a reflection. The sky was intensely black in
EASTERN and WESTERN PORTION. STARS were out in fullest
brilliance, while object seemed only half as brilliant.

SECTION E

(Circle One): Yes or No

26.1 IF you answered NO, then when, where, and under what conditions did you see other ones? _____

27. In your opinion what do you think the object was and what might have caused it?

open to speculation! To fully appreciate its size, characteristics, and behavior, one must see it for himself. IT WAS NO OBJECT KNOWN ON EARTH or to my knowledge. IT WAS NOT METEOROLOGICAL PHENOMENA. WHATEVER ITS SOURCE, IT WAS ARTIFICIAL and seemingly controlled!
