SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

INFORMATION COPY

1. The unidentified flying object was sighted in the vicinity of Fort Benning, Georgia at approximately 2120 hours on 21 November, 1952. When first seen it was of a bluish-white color and travelling a WNW direction but following a zig-zag course. It turned to a dull orange color and disappeared from sight. It reappeared in approximately one minute and it had returned to its original color and its position indicated it had been travelling while invisible. At this time the object turned North and held this course for about two minutes and then turned to a South-South East direction. It held a constant course in this direction until out of sight.
2. All observers seemed certain it was neither a meteor nor a weather balloon but none would venture an opinion as to what they thought the object was.
3. The weather was very good, with ceiling and visibility unlimited.
4. As far as can be ascertained by this Headquarters only five people saw this object.

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

This report covers sighting of unidentified flying object made at AEC installation, Aiken County, South Carolina.

This Headquarters received a call on 24 November 1952 from Mr. [REDACTED] of the Security Division, AEC, Savannah River Operations Office, Augusta, Georgia. Mr. [REDACTED] stated that at 212322Z two heavy equipment operators working at the AEC installation made a visual sighting of a glaring red fireball. Fireball was round, of unknown size, with no trail or sound. Object moved fast and seemed to fade away from sight to the SSE. Object was observed for approximately thirty seconds before disappearing.

Observers were [REDACTED] and Mr. [REDACTED] employed as heavy equipment operators by AEC. Probably untrained observers.

Weather was reported as clear.

No further information received.

GERMANS DESIGN FLYING SAUCER

"ONE of the German enterprises that were very active before the war and are now picking up again is the aeronautical research association attached to Aachen's Technical University."

"The association was formerly responsible for several original designs of aircraft, including gliders, and many of its ideas are believed to have been incorporated in the building of Nazi fighter planes."

"Now the brains of the association have produced a design for a revolutionary type of aircraft which might look remarkably like popular conceptions of the mysterious flying saucer."

"The new design is shaped like a plate with a large, round, hollow space in the middle; it also has a rudderless steering system based upon air pressure which simultaneously regulates the climbing or descending speed of the aircraft."

"After tests with a model constructed from the original designs, experts of the research association say that it has great advantages in safety, compared with aircraft of traditional shape and design."

ROBERT G CROWDER
Major, USAF
Assistant Air Attache
