AFL 200-5 and TT 68th DOI 1367

An unidentified object was observed by ten (10) crew members of the 52nd Bombardment Squadron, 68th Bombardment Wing, on 12 February 1953.

Ref. Par. 7c AFL 200-5, 29 April 1952:

(1) Ten (10) crew members of the 52nd Bombardment Squadron, observed a single unidentified flying object, delta shaped, and approximately fifteen (15) feet in diameter, bluish white color. Trail appeared in pulse-jet fashion, white pulses being much smaller than the object. The object resembled a flaming-rag thrown into the air. The pulses extended to the rear four (4) times the length of the object. The object suddenly disappeared approximately twenty (20) miles from the observers. Its brightness was greater then the star Sirius and had a steady brilliance. There was no menuever or loss of altitude in its 90 degree azimuth. The object approached from 130 degrees and proceeded in a straight and level flight. (2) The observation was made visually from the ground at 0600 hours Central Standard Time and persisted for twelve (12) seconds when it suddenly disappeared. (3) The observation was made during the preflight of a B-29 aircraft about two hundred (200) yards north of Hanger 3. Lake Charles AFB La. (4) The object appeared to be at an estimated altitude of five thousand (5,000) feet and travelling at fifteen hundred (1,500) miles per hour. (5) The observers are considered reliable. (6) Weather in area CAVU, winds aloft 310° at 35 knots, 5000 feet. (7) There was no meteorological activity. (8) No physical evidence or photos were obtainable. (9) No interception or identification action was feasible. (10) There was no traffic in the area at the time of observation.

Approved: DONALD R. CASETY

MAJOR USAF Intell Officer Lake Charles AFB

12 February 1953

## I. Description of Incident

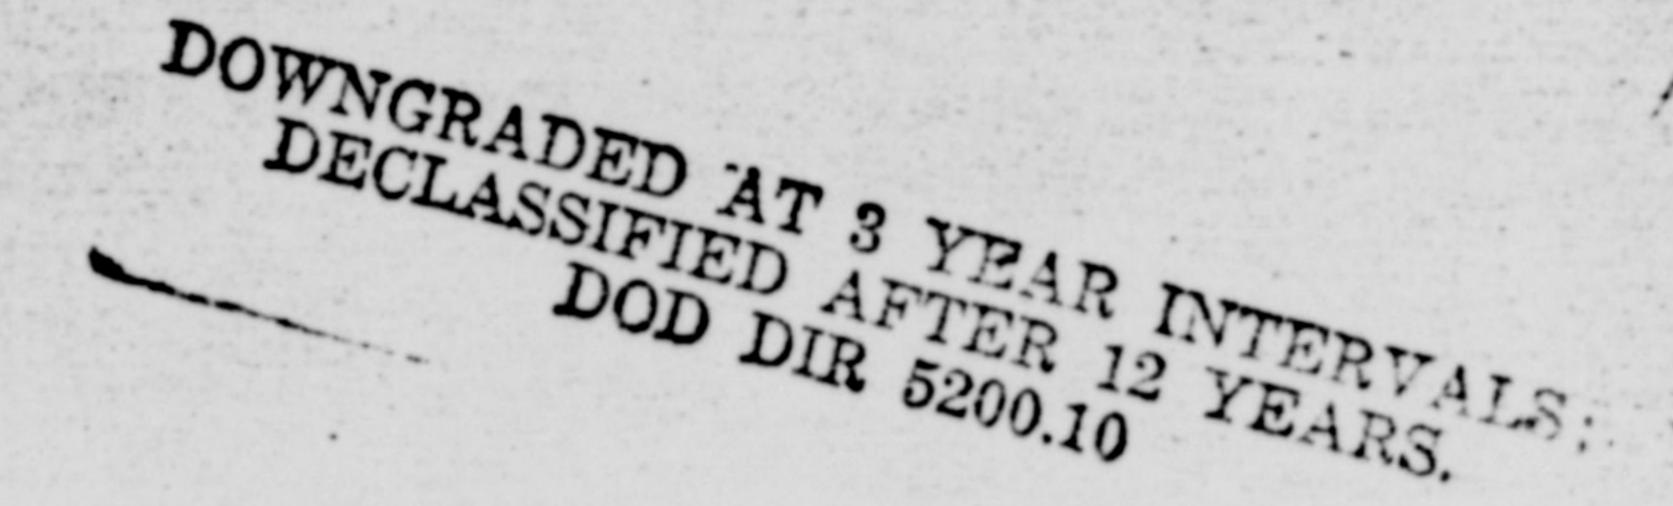

A bluish-white object with a tail was observed by six Air Force personnel in a combined air-visual and ground-visual sighting. Time of sighting was for a very short period, a matter of seconds. The air crew involved estimated that the streaking object was on a level with them and 20 miles distant. The object was compared to 2 flaming rag thrown in the air. There was no sound whatsoever.

## II. Discussion of Incident

Weather conditions at the time of sighting (0600 CST) were CAVU and facilitated easy spotting of meteors. This sighting was undoubtedly caused by the passage of a meteor or "fireball" through the earth's atmosphere which had unusual coloring.

## III. Conclusion

Probably astronomical.
