AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE	OF	PAGES
D/I EADF, Stewart AFB, Newburgh, NY	IR-30-53E	3	3	3

The shape of the object was difficult to determine, but observers stated the sun caught the object in a bank, at which time the nearest thing they could compare it to would be a diesel railroad engine. It was blunt and bulky in nature and they were quite positive that the object did not have wings. The very high speed of such a large bulky object caused the two observers to wonder and pay close attention. The object was noiseless, which also caused wonderment on the part of the observers. They cupped their hands behind their ears to try and pick up some sort of noise, but failed to do so. There did not appear to be any smoke, contrails, or flame.

f. Weather:

Light clear day, visibility excellent, with very light winds.

g. Air traffic:

Observers had observed some traffic, such as cargo planes in the general vicinity, which appeared to be heading for Stewart Air Force Base. Little attention was paid to this traffic.

2. It is the opinion of the interviewer that the two informants were very sincere in their reporting. Both gentlemen are local business men in their late fifties. Their reasons for not reporting the sightings sooner were that they might appear foolish, or that their eyes had played tricks on them. Upon discussing the subject with other civilians, they were encouraged to report the incident to the authorities, which resulted in their visiting this headquarters.

DATE August 21 - 1953

On July 3 I was sitting on bench at Fenner - Partridge Park, east end of pond, saw bright flash in sky at North easterly direction, was plane, it was near enough we should have it noise, so thought it was a glider at first flying a figure 8 on each banking turn was a flash as it was turning from south to north and caught the sun as it banked but more so on its south banking which went on for about 15 or 20 minutes just above tree tops, then it disappeared behind the trees, then suddenly it shot straight up, leveled off at about twenty-five hundred feet and drove directly east at such speed you only had time to think it seemed almost impossible. I did notice it had two (2) rows of windows the front looking like that of a new diesel engine, the wing spread looked as if it had retracted in flight, but it was so fast I am confused about this a good airman could straighten this by talking with me I am ~~sure~~ sure.

It is almost impossible to describe this as it should be. I am not capable. I know the very quietness of this plane is the mystery to me. If it had not been for the flash in the sun I would never have noticed it and its strange figure & or it could have been just an oval, but I'm quite ~~at~~ sure it was an E figure. I have been unable to find any other person that saw it, besides my father was with me, and my daughter but she didn't notice its quietness as she was where there was some noise, as was when it was 99 per cent quiet, hope this gives you some thing of the picture

I can explain much better.

August 21, 1953

July 3, 1953, while sitting in Vanhook-Darwin Park, I was attracted to an object as bright as a small sun. Then it faded out in brightness and appeared dark like a plane at a distance of over three miles or more just above the tree tops. After circling for a time it rose straight up, but appeared a little closer, then moved eastward, faster than any jet plane, and disappeared, appearing like a tailless comet, in speed and flashing brightness.
