STATEMENT

At approximately 0015 hours 22 August 1953, the undersigned sighted, west of my house, 155 Fabard Drive, about one-half mile away, a reddish brown light without reflector or sound moving south in an erratic up and down motion across the sky, at approximately 1500 to 2000 feet altitude. The actual speed is unknown, but it seemed to move fairly slowly. It appeared to be larger than a star and resembled a star.

About 5 seconds after I sighted this object, I called my wife, Grace Foley, out of the house and we both had a visual observation of the object for approximately 25 seconds longer when it slowly disappeared behind the houses across the street, moving from south to east.

About 10 minutes later an aircraft was sighted flying a southeast path. He turned on his landing light which were easy to distinguish as landing lights. Also, he could be heard. About 6 minutes after this aircraft was sighted, another one was sighted flying from south to north, and this aircraft passed to east of house, and was also heard.

STATEMENT

I was called out of the house at approximately 5 seconds after 0015 hours on 22 August 1953, by my husband, James V. Foley, to see a strange light flying by the house. This light was a reddish brown and did not resemble an aircraft or part of an aircraft in any way. There was no sound. I watched this strange object for about 25 seconds until it disappeared from view behind the house next door. It traveled from north to south, then turned east.

ABOUT 10 MIN. AFTER THIS OBJECT WENT OUT OF SIGHT I WENT OUT AND SAT IN FRONT YARD TO SEE IF IT WOULD RE-APPEAR AND I SIGHTED AN AIRCRAFT MOVING FROM NORTH WEST TOWARD KELLY AFB AND HE TURNED ON HIS LANDING LIGHTS MOMENTARILY AND TWO DISTINCT BEAMS WERE SIGHTED WHICH WAS NOT AND DID NOT RESEMBLE THE OTHER OBJECT. THIS A/C WAS IN PLAIN SIGHT AND COULD BE HEARD, SIX MINUTES LATER ANOTHER AIRCRAFT WAS SEEN TO THE EAST HEADING FROM SOUTH WEST TO NORTH EAST AS IF GOING TO ALAMO FIELD. THIS A/C COULD ALSO BE SEEN AND HEARD. THE MOON WAS SHINING.

THE OBJECT HAD A QUICK UP AND DOWN MOTION BUT APPEARED ALMOST TO MAINTAIN A LEVEL FLIGHT ATTITUDE.

Hydrographic Bulletin

METEOR

The Hydrographic Office is cooperating with astronomers who are studying meteors. Mariners reporting their observations of these bodies are greatly assisting in this work. It is desired to have the Greenwich time and point of appearance and disappearance as accurate as possible, either by bearing and altitude, or by relation to fixed stars, or both.

Complete observations on long-enduring trains and their direction of drift are of especial importance, as they determine wind direction in the upper atmosphere.

NORTH ATLANTIC

Chief Officer Francis Campbell of the British SS. *Bembridge Hill* reports that on August 23, 1953, in lat. $40^{\circ}00'$ N., lon. $40^{\circ}30'$ W., a brilliant body, traveling in an E. by S. direction was observed.

The first indication of any phenomenal occurrence was a bright green diffused glow on the superstructure of the ship, lasting for about 1 second. This green light was reflected from the sea directly beneath the traveling body.

The body, traveling extremely fast, coursed parallel to the surface of the sea and disappeared into the clouds emitting a stream of "sparklers."
