

1. DATE - TIME GROUP 21 November 53 21/2300Z, 22/0115Z, 22/0115Z, 22/0119Z, 22/0120Z, 22/0121Z, 22/0200Z.	2. LOCATION Kirtland AFB, New Mexico ✓
3. SOURCE Varied	10. CONCLUSION Astronomical (METEOR SHOWER)
4. NUMBER OF OBJECTS Two	OIC, Flt 1-D, 4602d AIBS, evaluates observation as possible
5. LENGTH OF OBSERVATION 1. 1 Sec, 1 Sec. 2. 2-3 Seconds	11. BRIEF SUMMARY AND ANALYSIS Two quick successive blue flashes of light was observed by AF pilot and comptroller at Control Tower. Pilot saw bright illuminates above and behind a/c. Multiple observations.
6. TYPE OF OBSERVATION Ground & Air-Visual	
7. COURSE Not Reported	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No

22 Nov 53
SHEMYA Island

Hydrographic Bulletin

A cooperating observer reports the following: At 1610 G. M. T., November 22, 1953, while lying off Shemya Island in lat. $52^{\circ}52'$ N., lon. $174^{\circ}13'$ E., observed a large meteor. It appeared at (approx.) 35° altitude traveling in a westerly direction. Visible for approximately 20 seconds, it traveled horizontally a distance of about 60° of arc from east to west. The meteor first appeared as a bright ball of fire with a brilliant green-tinted fire trail behind it. Midway in its arc of flight it seemed to burst into two very bright balls of fire, then all disappeared at about 15° altitude.

Weather was cloudy, with bright moonlight.
