Dear Sir,

The date was May 29, 1954, the time was 5:00^{PM} o'clock. I was sitting in my front porch with my friends. Something made me look up (which I always do when I am outside). I saw a silvery projectile, tube like something. I kept my eyes on it for about 3 minutes as my friends did too, the object stayed motionless and that when I decided to get a picture of it, it moved on my friends like and rood as fast as I could to a drug store where I live. I bought 1 roll of film for my baby brownie camera, I stood out in ~~front~~ front of the store and took 8 pictures, people came near me and asked what I was taking a picture of in the sky. So they looked up to and saw it. The object ~~by~~ stayed there moving South East very slowly against the wind.

So I bought another roll of film and
took 8 more pictures I am enclosing some pictures
which you can examine and see for yourself that
I am not lying. I will also enclose drawings
that I made while observing the disks thru
my telescope, they are ~~off~~ of actual size as I
have seen them. The first two are five minutes
apart and the rest are about 45 seconds to 1
minute apart. The full time of the sighting
was from 5:00 o'clock P.M. to about 7:00 P.M. The
disks change color as I ~~was~~ ^{was} observing them,
from a pure white in the center of the disk and
an orange corona outer edge. Then they change
color right before my eyes to a yellow and the
orange edge did not change color. And this is
not the reflection from the setting sun which
the sun turns the sky to yellow while setting
the sun was still very high up. As I was
observing the 7 disks thru my telescope another
one came into view ~~which~~ which might have
been flying parallel with the two top ones
and ~~was~~ ^{was} move slightly behind the ~~other~~
then they changed their course from S.E. to
South, then they vanished.

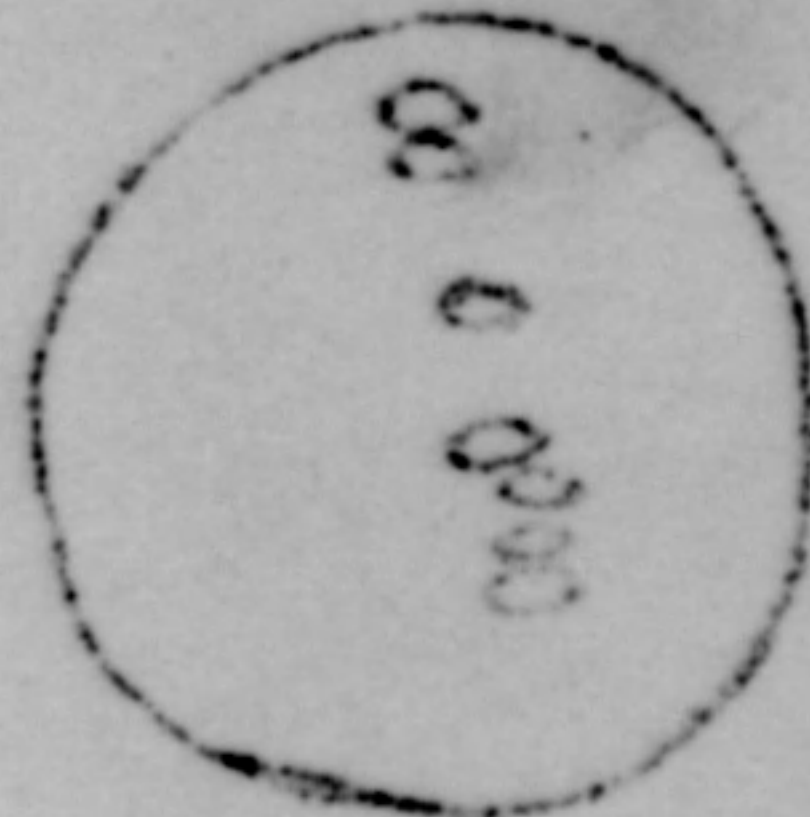

I hope you will enlarge or enlarge the pictures
I am sending you, so you can see for yourself
what I had observed thru my telescope.
I hope that you will ask for more complete
details or send me observation sheets which I
can write the more complete details in observing
form.

P.S. I hope very much that you will be satisfied
with my pictures for I've been ~~waiting~~
waiting 2 years for this sighting because I seen
a similar sighting before with 4 cigar shaped disks
a big quarter I thank "God" that I made
this sighting and for the pictures.

~~PS.~~ I am 12 years old
and have 20-20 vision.
my doctor ~~also~~ told me,
this is the 44 unknown
flying objects I have seen
in my area over the last 4 yrs.

Thank you
~~_____~~
Chicago 73 ill.

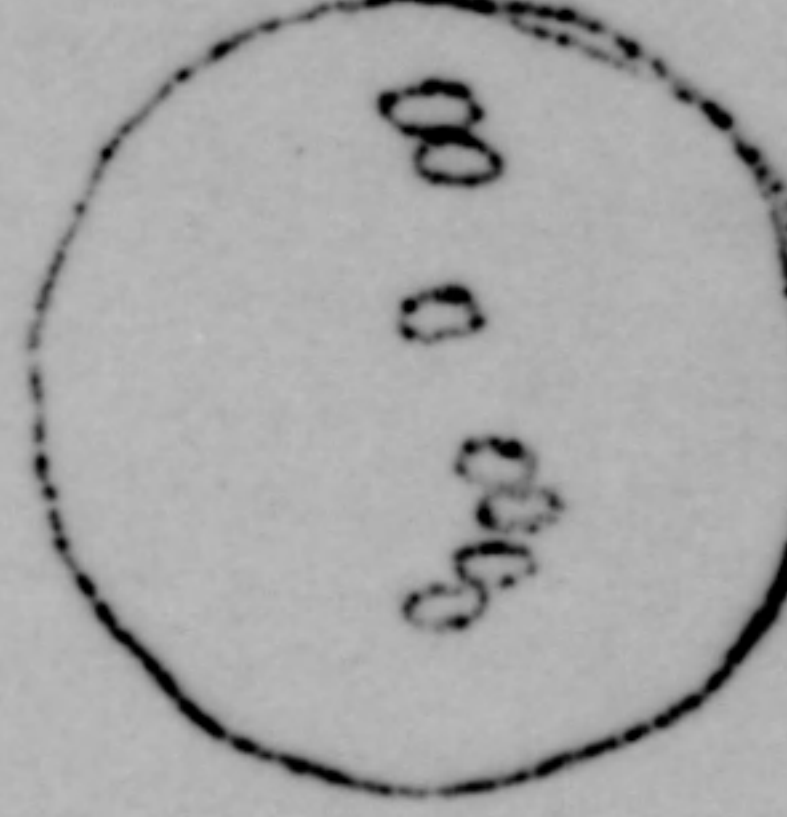

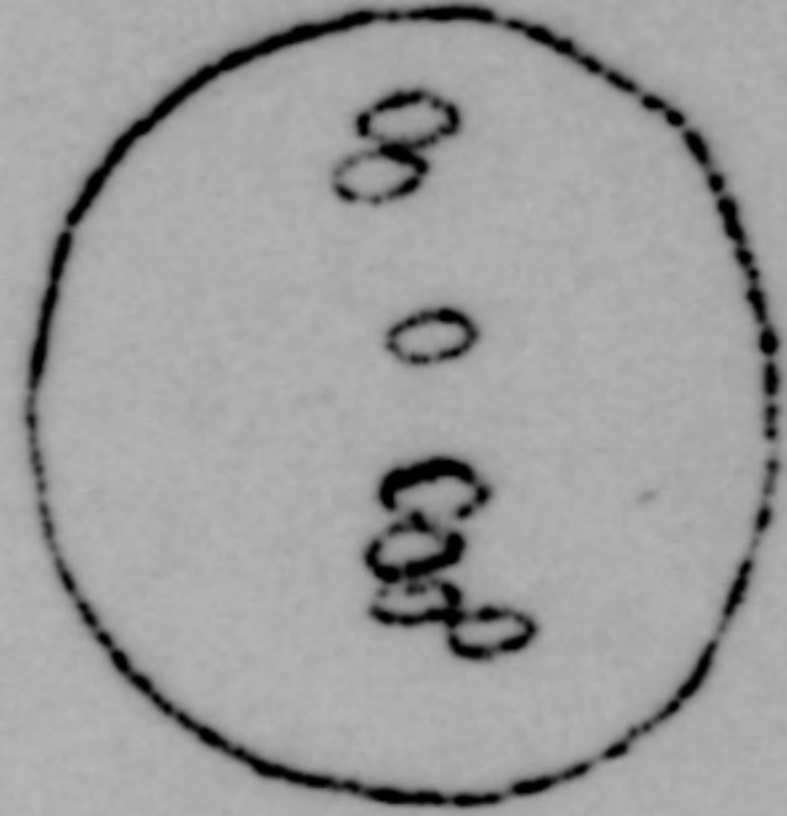

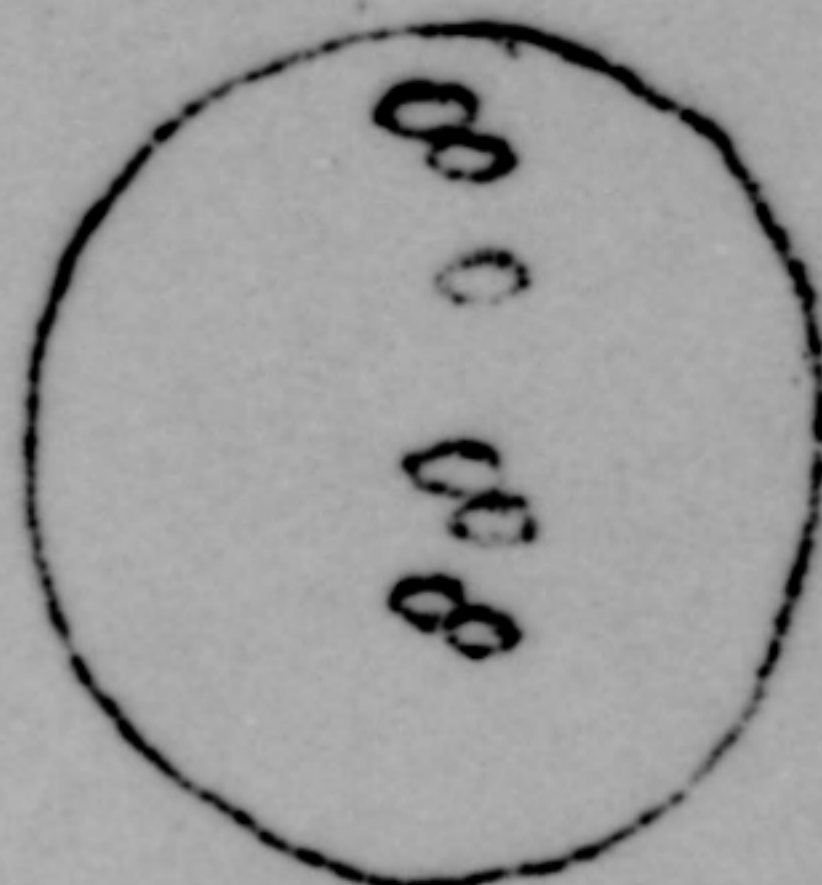

Another saucer came into view with
the same top cells

Same disk
left

With ~~observed~~ ^{observed} by the same person
look like the
other but the
tube

They moved
slowly but
very slowly
then the
tube looks
