This object was seen from the roof of a five-story building.

It was seen by myself and a friend, [REDACTED]

[REDACTED] on the roof of the aforementioned building.

Even though we could not determine the exact altitude of the object,

we assumed it to be of a rather high elevation because it reflected

the rays of the sun which was already sinking low in the west.

The wind-velocity was approximately 12 m.p.h. The temp. was be-

tween 75 & 80 degrees F.
