In compliance with AIRS 2019-0872's 12 August 1994, SUBJECT INFORMATION
PLANNING OFFICE REPORTING (SHG) IS FILED IN THE AIRS 2019-0872
SUBJECT INFORMATION IS SUBMITTED.

On 15 October 1974, an unidentified flying object (UFO) was observed by the [REDACTED] Albuquerque, New Mexico, while in the Santa Fe Mountains near Hobbs, NM. The object was observed in shape, size, in color, height, and considerable evidence of altitude and had no tail, sound, or contrail. The object was travelling at a rate of speed as stated by the observer to be "comparable to light" and was accompanied by no sound material to the observer. This sighting is believed to be the misinterpretation of a conventional aircraft in turn reflecting the rays of the sun. There was no physical evidence obtained.

CLASSIFICATION

AIR INTELLIGENCE INFORMATION REPORT

1. Title	2. Report No.	3. Date
1. 1-5, 1602, /INS	11-1-6	17-1-6 2-1-6 3-1-6 17-1-6

- Description of the object:
 - Shape: Like a cloud
 - Size: One-third (1/3) size of cigar held in adult hand
 - Color: Gray, white fluorescent
 - Number: One (1)
 - Formation: 1/1
 - Any discernible features or details: Edge fuzzy or blurred
 - Tail, trail, or exhaust: Negative
 - Sound: Negative
 - Other pertinent or unusual features: Negative
- Description of course of object:
 - While driving truck North at speed of 10 MPH when object appeared
 - 90-100 degrees from true North and 5 degrees from horizon
 - 30 degrees from true North and 25 degrees from horizon
 - Facing NE with the Santa Fe range in background and it appeared and accelerated from Texas Canyon directly in front of Santa Fe to the very top of Santa Fe, in a straight line. Upon its disappearance after a few seconds a 90 degree turn was made by observer and an object appeared above 3 fighter aircraft which were landing at Kirtland AFB. This object was silver in color and approx 50000 ft high.
 - Merely disappeared from vision.
 - Approximately 2 seconds.
- Manner of observation:
 - Viewed first through truck windshield. Viewer stopped vehicle as soon as possible and continued to observe from running board of vehicle.
 - Seen through windshield and with naked eye only.
 - Viewer was not airborne.
- Time and date of sighting:
 - 13/18/52 Oct 5/
 - Bright Daylight
- Location of Observer:
 - (General EPR 2205) From a point 1 mile S of South gate to Santa Corp near Albuquerque, NM.
- Identifying information of observer:
 - Civilian, Mr. [REDACTED] 25 years of age, [REDACTED] SE, Albuquerque, New Mexico, Mechanical Technician of Santa Corporation.
- Weather conditions:
 - Bright daylight, clear sky, slight breeze, cool temperature.
 - Report from AFS at 34th Air Division (Det) of wind direction and velocity in degrees and knots:

Surface	292 degrees at 8 knots
6000 ft	270 degrees at 17 knots
10000 ft	250 degrees at 18 knots
16000 ft	290 degrees at 42 knots
20000 ft	290 degrees at 42 knots
30000 ft	260 degrees at 44 knots
50000 ft	270 degrees at 27 knots
 - Ceiling clear
 - Visibility 80 miles
 - Cloud cover Negative
 - Thunderstorms in area Negative

AIR INTELLIGENCE INFORMATION REPORT

REF ID: A6025 ATSS

REF ID: A6025

REF ID: A6025

- 8. Any other unusual activity or conditions which might account for the sighting Negative
- 9. Interception or identification action taken Negative
- 10. Location of any air vehicle in the area at time of sighting. Three (3) F-66's in area
- 11. AONC REF ID: A6025 ATSS: Suggests that due to extreme brightness of day and fact that sighting was made against the dark background of Santa Rita and reflected rays of the sun from the vehicle's windshield or some other part of the fuselage caused an image to be made on the retina of the viewer's eyes. This image remained impressed on his eyes even after his getting out of truck and remained for approximately 9 seconds. Upon his following the object to the top of the mountain where the blue and brighter background of the sky caused the contrast to subside or disappear the viewer made a 90 degree turn toward the darker background of Kirtland Air Force Base where three aircraft were landing and again saw the spot for a few seconds.
- 12. Existence of physical evidence: Negative

Robert M. Yates
ROBERT M. YATES
2nd Lt., USAF
AONC

Comments of Approving Officer:

Information contained in the preliminary and follow-up field investigations indicates the probability of reflections from the sun, creating a temporary image.
