Statement of C-3 JAMES W. SCHMIDT, USA

SECRET

Saturday evening on 6 Nov 58 at 8:20 P. M. I was traveling to WASHINGTON, DE LAWARE on Route 40 we sighted two unidentified objects. At the first sighting I told him to pull over between the objects were dark, they were foreign to me. I rolled the window down and watched the objects as they moved slowly. The objects stopped and changed position. They were in a trail formation and changed to side by side and they continued this way out of sight.

The second sighting a few minutes later was when the objects (at a trail) flashed across our front going about 500 mph. from left to right. They then disappeared behind a hill.

The third and final sighting was about two minutes later. The objects were hovering on our left. We stopped and got out of the car. The objects were maneuvering slowly. They got very close to each other and then moved across the highway. At this point we could hear and feel a vibration from the objects. This was the closest the objects came to us. They crossed the highway and stopped again and maneuvered. Then at a trail they moved away and crossed the highway again. One object slowed, the other kept the same speed, about 500 mph. Then the object in the rear did a fast 180 degree turn and a sharp climb over the highway where it shot a beam of light down on the highway. The other object gained and the two objects headed toward the Delaware Memorial Bridge and out of sight. The last sighting was the longest and took about four minutes.
