I. SOURCE:

Address Hollywood 28, California

Age: 49 yrs.

Occupation: Song writer, Entertainer and Ground Observer

Education: Completed High School; a course in Stenography and general office work; and is a College of Journalism graduate.

Qualifications: Member of the Ground Observers Corps.

- II. RELIABILITY: Poor. During a personal interview, Mr. Delong spoke of having once reported a sighting which turned out to be a pelican flying over. He seemed to be excitable and placed importance on reporting everything without enough forethought, as was evident in errors in giving observation time and size of object in his original report.
- Observation Post at the time of the sighting (090615Z July 55).

 The night was clear, dark, dry and cool, with a slight breeze blowing. There was no moon and many stars were out. A single object was observed for a period of three (3) to four (4) seconds. This is contrary to Source's original report, which stated that it was a 30 second sighting.
 - A. The object did not appear to stand still nor suddenly speed up and rush away at any time. The object faded out at its disappearance. The object appeared overhead at approximate—ly 70 to 80 degrees from the horizon to the north, and traveled to the north, fadeing out of view at 60 to 70 degrees, not behind any object.
 - B. Source changed the original estimate of size in his initial report from that of a silver dollar to that of a dime held in the hand at arms' length. Source does not wear glasses and did not use any visual aids for this sighting.
 - C. Source believed this sighting to be a meteor.

Inclosure #1, Part Three, Report #10-UFOB-10-55. Statement of Albert J. DeLong

第一年第一年第一年

While facing north I noticed a bright object high in the sky traveling straight north. Object was observed for three to four seconds and seemed to be moving on a level plane. Its' size compared with a dime held in the hand at arms' langth. Object was round in shape and had a light green tinge of color surrounding its' body which was a brilliant white.
