APPROVED:

JOHN M WHITE J. Colonel, USAF Commander

| | SUPPLEMENT TO AF FORM 112 | | | | | |
|--------------------|---------------------------|------|---|----|---|-------|
| ORIGINATING AGENCY | REPORT NO. | | | | | |
| Det 3, 4602d AISS | D3-UFOB-4-55 | PAGE | 2 | OF | 9 | PAGES |

I. SOURCE:

Age: 24

Occupation: Automobile insurance adjuster

Education: College degree with one rear post graduate work

Address: Rego Park 79, New York

II. RELIABILITY: SCURCE was a nervous, but cooperative young man who was performing what he considered his civic duty. He made no mention of the sighting to his neighbors, relatives or friends. The fact that he was not a publicity seeker was evidenced by his request, over the phone, that the investigator call at his home in civilian clothing in order to prevent any possible embarrassment to him and his wife. On the basis of the SOURCE's intelligence, education and sincerity at the time of the interview, it is the opinion of the investigator that the SOURCE be considered reliable.

III. SOURCE'S DESCRIPTION OF SIGHTING:

- 1. SOURCE, together with his wife and landlady, was standing in the back-yard of his home in Rego Fark, New York (CEOREF HJBL 0843) at 31/0230E JUL 55.
- 2. SOURCE glanced up and observed four (4) spherical objects, grouped in pairs. The first pair moved east to west and the second pair in a west to east direction every fifteen (15) or twenty (20) seconds.
- 3. The objects were observed for approximately thirty (30) minutes before disappearing. The sky was cloudy with no moon or stars visible. The temperature was relatively high.
- 4. SCURCE described the objects as being "the color of a light bulb" and that they reminded him of "spotlight beams; except that there were no visible shafts of light supporting them." At all times the objects remained constant, neither being obstructed from view, nor fading from sight.
- 5. The objects were estimated by the TOURCE to be approximately five (3) miles from him in a NAW direction (approximately 3150).
- 6. SCUNCE stated that the objects were about the size of a pea held at arm's length.
- 7. SOURCE's opinion as to the cause of this phenomenon was that "it could have been a searchlight hitting overcast clouds and moving back and forth.

STATEMENT

At approximately 10:30 we saw four (4) spherical objects. They were grouped in pairs, crossing each other as they moved west to east and east to west. These spheres changed course about every 15 or 20 seconds, and after a half hour finally disappeared.

STATEMENT

All four of my sixty inch power searchlights were operating on the evening of the 30th of July, between sunset and midnight. They are operated on separate electrical rotor units of varying speeds, thus making possible an infinite number of combinations of various patterns. It is not uncommon for these beams of lights to be visible for several miles.

KELINGORIE

INVESTIGATORS SUMMARY

- 1. Telaphone calls to the 26th Air Division, Roslyn AFB, Roslyn, New York and to COE, EADF, Stewart AFB, Newburgh, New York, revealed that there was no unusual aircraft, balloon or searchlight activity in the New York metropolitan area at the time of the sighting.
- 2. After the interview with the SOURCE, these facts were known to the investigator:
 - (a) The objects noved in pairs from east to west and west to east; this patterm never changed during the sighting.
 - (b) The color was similar to that of a light bulb.
 - (c) Total duration of sighting covered approximately thirty minutes.
 - (d) The cloud conditions at the time consisted of overcast Nimbus and Cumulous clouds.

It was logical to assume that the sighting was caused by wither of the following:

- (1) The beams of two power searchlights illuminating one cloud layer, and reflecting on to another, thus giving the impression of four beams.
- (2) The beams of four power searchlights operating within reasonable proximity of each other.
- 3. A possibility existed that there was a slight error in the COURCE's estimate of azimuth of onjects relative to true North. The investigator, at the time of the interview, noted that the SOURCE was somewhat vague as to the distance and exact location of the UFOB. Applying a creditable latitude of error to the azimuth of the sighting, the investigator explored the possibility that this (presumed) searchlight activity had originated in the Times Square area of New York City where movie premieres, sporting events, etc. are provalent, particularly on Saturday nights, at which time the sighting had occured.

stated that a pattern as described by the SOURCE was very possible, and it was not unusual for his lights to be visible from the relatively short distance of approximately 10g miles.

5. It is the investigator's convigition, therefore, that these lights were the four spherical objects observed, notwithstending slight miscalculations on the part of the SOURCE concerning distance and azimuth.

JOHN PROMA

Major, USAF Officer in Charge

COMMENTS of Approving Officer:

Concur with the opinion of the Preparing Officer that the sighting was caused by searchlight activity described in this report.
