| 10. BRIEF SUMMARY OF SIGHTING<br><br>One pink obj, shaped like a streak, seen heading south, observed for ten minutes. Disappeared in upward direction, assumed alt at 15,000 ft. |  |                                                                                                                                                                                                       |  | 11. COMMENTS<br><br>Sighting took place at dusk, accounting for color. Winds in a southerly direction at estimated alt of obj. Above seems to substantiate possibility of balloon sighting.                                                                                                                                                                                                                                                                                                                                                                                                             |  |

| 10. BRIEF SUMMARY OF SIGHTING<br><br><b>One (1), pink object, shaped like a streak, was seen heading south, and was observed for a period of ten minutes. DISAPPEARED IN UPWARD DIRECTION ASSUMED ALTITUDE AT 15,000 FT.</b> |  |                                                                                                                                                                                                       |  | 11. COMMENTS<br><br><b>This sighting took place at dusk, which would account for the color. The winds were in a southerly direction at the estimated altitude of the object. The above would seem to substantiate the possibility of a balloon generated sighting.</b>                                                                                                                                                                                                                                                                                                                                  |  |
