ATIC FORM 329 (REV 26 SEP 52)

Case 165, Conway, Mass. July 2, 1956—Predating Fourth of July's fireworks, about the same time as the Bromley and Bloomington sightings, was an incident which involved a reversible UFO. The sighter the but its behavior proved differently. Said the Greenfield Recorder-Gazette: "It appeared to be composed of one bright light and although traveling at what appeared to be a high rate of speed, was able to reverse

its course completely. A low-pitched hum, rather than a whir was detected. The object crossed and recrossed the sky several times before speeding away." *1
