7. LENGTH OF OBSERVATION	8. NUMBER OF OBJECTS		00	Other Data for Evaluation
25 minutes & still in sight at rpt	one	erratic/high	0	Unknown
10. BRIEF SUMMARY OF SIGHTING		11. COMMENTS		
One round object, larger than star, orange in color, moving up & down and north and south, still under observation and had already been seen for a period of 25 minutes.		Possibility of heavenly body. Atmospheric conditions possibly causing the erratic movements as well as the fact that viewing through binoculars can cause apparent movement. Color substantiates.
