5. PHOTOS ☒ Yes (Drawing) ☐ No	6. SOURCE Civilian		
7. LENGTH OF OBSERVATION Three to four seconds	8. NUMBER OF OBJECTS Two	9. COURSE Westerly	
10. BRIEF SUMMARY OF SIGHTING Two objects seen flying in a westerly direction. Objects were observed visually for 3 - 4 seconds.			11. COMMENTS This report was received by AF Form 112 from Hqs WADF. A copy has been forwarded under separate cover. A pastel drawing is also being forwarded for your analysis. This sighting falls into category of "Insufficient data for evaluation" due to the shortness of length of time in sight. <i>METEOR SIGHTINGS</i>

quality and solid nature for several years have been, and may be now, actually present in the atmosphere of the earth.

2. Globes of green fire also, of a brightness more intense than the full moon's, have frequently passed through the skies.

3. These objects cannot be explained by present science as natural phenomena, but solely as artificial devices, created and operated by a high intelligence.

4. Finally, no power plant known or projected on earth could account for the performance of these devices.

Let us first review some widely known facts.

The shapes and the inscrutable portents of the flying disks first broke upon the skies of the world in the early months of 1947, with several sightings reported to the Air Force. The story first reached the nation on June 24, 1947, when a private pilot named Kenneth Arnold

chainlike line," approaching Mount Rainier, one of the high peaks at a speed Arnold estimated at

Arnold told the whole story to his home town summer high thing it flashed across the country. It had been reported by people in 40 states. It itself merely reported in its issue of July 1, 1947, provided the biggest game of hex-stillhead. It was a boy or child with talent enough to see something his name in a newspaper.

Nevertheless in serious moments most people have all the "chromium hubcaps," "flying saucers," "doughnuts" in the sky. Buried in the heap of some sobering cases. One was the calendar of Captain Thomas F. Mantell on Jan. 7, 1948. He and two other F-51 fighter pilots sighted

7. LENGTH OF OBSERVATION 20 minutes		8. NUMBER OF OBJECTS one		9. COURSE overhead to W	
10. BRIEF SUMMARY OF SIGHTING Obj resembling balloon or parachute & silver in color, observed directly overhead through binoculars. Altitude estimated at 15,000 feet. After 20 min moved about 10 dgr west & exploded.				11. COMMENTS The fact that the object resembled a balloon or parachute, but remained aloft for at least 20 mins indicates that it was probably a balloon. Parachute would have probably descended during that period. Two balloon sites are located in the Seattle area.
