RECORDED
HC 700 512

With this rough timing, this plane should have been only a very few miles south-east, with the UFO dead ahead, in clear blue sky, and could have been seen and possibly reported by this crew.

This object positively in no way, in appearance or performance, resembled a balloon, plane, meteor, bird, smoke, feathers, paper, cobweb, or a flaw or reflection in my windshield.

Two separate reports of Unidentified Flying Objects sighted over Durango, Texas, were sent to James Connally Air Force Base, at Waco, in July and November, 1952, and each was separately and personally investigated by Air Force Officers.

This latest sighting was telephoned promptly to the news department of the local Temple Telegram, with an offer to fill in any needed details for a news item of the odd event; the news report has been ignored.

I shall be glad to offer any additional information or clarification that I can give regarding this latest sighting.

Gentlemen:

I wish to add this bit of information to my report of an unidentified flying object observed by me on July 31, 1958 at Temple, Texas, which was forwarded from James Connally Air Force Base at Waco, Texas.

In addition to my initial report, I have also completed and returned your ATIC Form 164, both given in the clearest description possible in writing; but today I was fortunate to view at a local theater the film, "Unidentified Flying Objects."

The single object which I observed and reported looked exactly like either one of the pair shown in that part of the film which was photographed in 1950 by Nicholas Mariana, at Great Falls, Montana, except the object I saw moved relatively slower, and was in view considerably longer, but otherwise was the same apparent size, shape, color and with the very same appearance during its dissolution.

A review of this particular part of the above film will present a visual duplicate of what I observed and tried to describe in my report and in Form 164.

I trust this will be helpful in evaluating this sighting.

Very truly yours,
[REDACTED]
