7. LENGTH OF OBSERVATION more than 1 minute	8. NUMBER OF OBJECTS one	9. COURSE north	- 0	Other	
		Trail condensation and dissipation depends upon the conditions in the air. Under certain conditions the dissipation is rapid and if so the trail would tend to remain the same length. Also the turn indicated to the witness depends upon the angle that the a/z was moving, the direction of the turn and the distance from the obsrvr. Nothing in rpt to conflict w/a/c analysis.			

ATIC FORM 329 (REV 26 SEP 52)

Aright-Patterson AFB
Dayton, Ohio

Dear Csptain Gragary,

inclosed herewith are three photographs and fire negatives obtained by the Betts Ave., North College Hill, Cincinnati, writer from Ar.s Chio, which may be of interest to your command. Mr. Is telephone number He is an employee of the local General Electric Co. 13 as follows: JA: and told the writer that he formerly had been a professional photographer, and, is at present, interested in astronomy, partioularly lunar studies. He is in contact with members of the Cincinnati Astronomical Society. According to Mr. photograph (which I have marked #3) with partial ovoid light camot be easily explained. Taken through his telescope, Mr. a said that he knew of no light of any kind before his lens, nor was he aware of any unusual lights in the sky, 'aat is., any lights appearing nearby which would show up at the size indicated. However, through powerful maghification an object, appearing visually as a pimpoint of light, may show up as photographed. Ruled out were Newton ring chenomena.

Mr. told the writer that he photographed the "object" while taking a series of shots of the moon. He has many times spokento the writer of his interest in the moon, and I feel certain that the photograph in question was not faked to delude the writer or others. He seeks no publicity. Mr. also gave me permission to contact your command regarding the photographs. for may contact Mr. for additional information regarding these photographs or, if you prefer, I will send whatever additional information you may desire.

The photographs taken by Mr. were taken on Sunday, October 14, 1956.
On this same date, CRIFO received three daytime sightings of UFO's from three separate groups of witnesses in the greater Cincinnati area. Names are as follows:

from Covington, Kentucky about 4 pm. Mr. Seeid the sky was deep blue, no wind. While driving in traffic, he saw large bright light about quarter the size of full moon. He said the object was stationary. By the time he had reached the next black, which afforded a visual clearing of the sky, the object had disappeared. Mr. Setressed the fact that the object was unusually brilliant and large. To raise out reflection on aircraft as an explanation. Mr. Setressed the fact that the object was

Mr. and Mrs.

Of the sighting from Mrs.

In an employee in the advertising department at the Mrs.

Mrs

BRIGHT TEO STARTING HERE - IT WAS DEED OLANGE, AND
THE BACK END MINIST PINE.

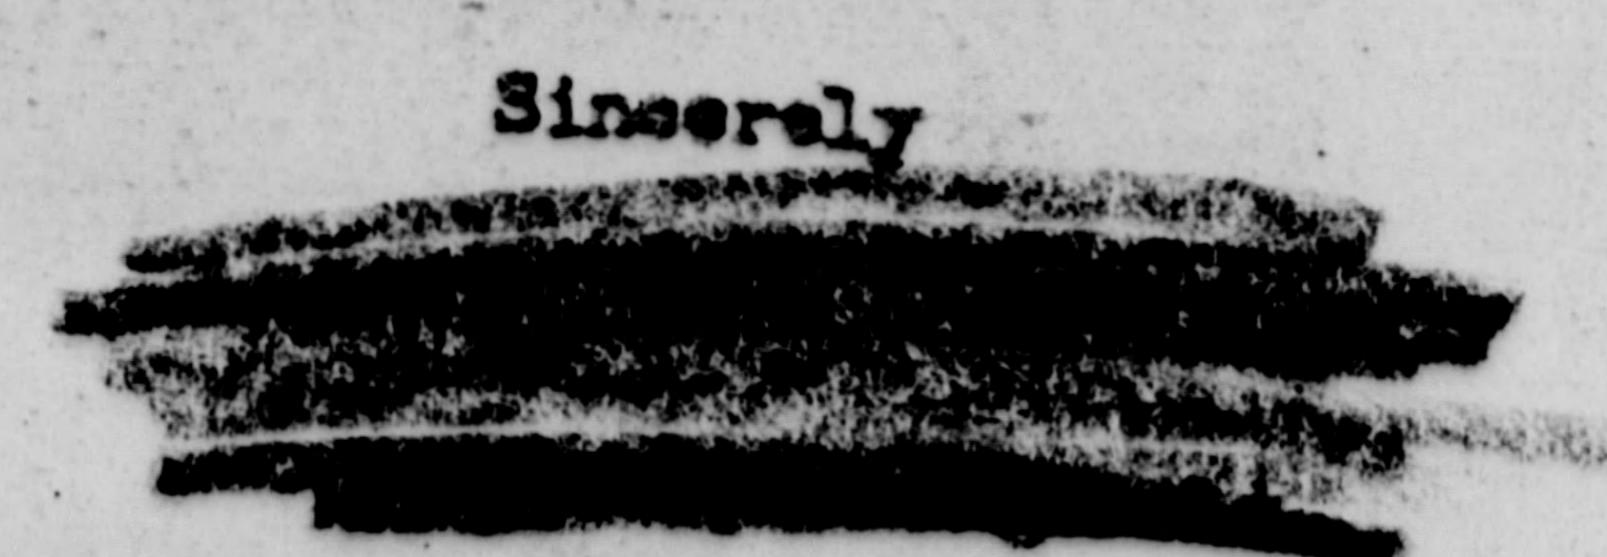

When the object turned it did not make an are but made a sharp turn like this

The whole thing seemed to turn at one time. A jet would have had a curve to its turn but this did not. My wife and son were with me at the time. She was driving se I did not take my syes off it until it was out of sight. They all saw it.

Object sighted in Northest from Highland Hts, Ky at about 1:30 pm. Mr. described the object as large, about the size of a nickel held or other appendages. He said the object appeared to be stationary for about a minute, and was quite laws:

Thus, in brief, are the descriptions of the UFO's seen by three separate groups on "stober 14, plus the photographs. I hope they may prove to be of value to you and your command.

Is light of the international crisis, I hope that I may be able to serve your command more thoroughly and expeditiously. I have not yet phened Lt. Colonal U. T. Greene in Washington in regard to the matter discussed by phone on November 6, 1956. I believe a phone call would only add to the confusion already existing as to my status. I might try by letter, however, hoping that clarification might be obtainable.

PS: Please return the enclosed photographs and negatives to the writer after analysis as Arms left them in my responsibility.

Dr. Hymk: It is not necessary to state That The loss of eng of these phitos or negatives, will only provide "material" for the press
