Eglin Air Force Base, Florida PAGE 1 OF PAGES

#### INCLOSURE #1

### STATEMENT BY CAPTAIN DANIEL

I was the Aerial Weather Reconnaissance Officer on the night of 1 November 1956 in a T-33 aircraft going from Springfield, Illinois to Eglin Air Force Base on a true course of 140°. After reaching an altitude at 35,000 feet, a steady orange light with a blue tinge was sighted near Mount Vernon at about 2330Z at about a 50 elevation angle and 2200 from the aircraft. I was unable to judge the distance, speed, for size of the object. There was no tail, or exhaust discernible. It did not appear to be a jet exhaust as the light intensity was constant when viewed from a changing direction. I do not believe it was a meteor as there was not any tail, nor another aircraft because of the lack of blinking navigation lights. The object was I la view for about two minutes, increasing nearly 5° in elevation and to about 320° from the aircraft position. As the aircraft was heading in opposite direction from the object. I was unable to view it any longer. The night was clear, with an waited ceiling and unrestricted visibility of at least 60 miles. The cloud formation in the area was thin altostratus on the East and Southeast horizon and clear in the vicinity of the object. I am unable to give a logical explanation for this reported sighting.

The above statement was given to Captain William M. Lyons by Capt Daniel.

	The pilot was Lt Colonel Walter A. Rosenfield, Jr., and the Aerial Weather Reconnaissance Officer was Orville H. Daniel. Lt Col Rosenfield is the Chief, Maintenance Division, 3243rd Test Group (Fighter), AFOTC, Eglin AFB, Florida. He has over 10,000 flying hours, is current in supersonic aircraft, and is quite familiar with aircraft exhaust and afterburner appearances. Capt Daniel is assigned to Headquarters, AFGC, Directorate of Test Requirements, Eglin AFB, Florida. He is an Air Force meterologist and holds an AFSC of 2524 and 2534. Inclosure #1 contains a statement by Captain Daniel.
