1. DATE 16 July 1957	2. LOCATION Cheyenne, Wyoming		12. CONCLUSIONS ☐ Was Balloon ☐ Probably Balloon ☐ Possibly Balloon
3. DATE-TIME GROUP Local 1157 MST GMT 16/1857Z	4. TYPE OF OBSERVATION ☒ Ground-Visual ☐ Ground-Radar ☐ Air-Visual ☐ Air-Intercept Radar		☐ Was Aircraft ☐ Probably Aircraft ☐ Possibly Aircraft
5. PHOTOS ☐ Yes ☒ No	6. SOURCE Civilian		☐ Was Astronomical ☐ Probably Astronomical ☐ Possibly Astronomical
7. LENGTH OF OBSERVATION 5 minutes	8. NUMBER OF OBJECTS one	9. COURSE W to E	☒ Other Contrails ☐ Insufficient Data for Evaluation ☐ Unknown
10. BRIEF SUMMARY OF SIGHTING Vapor trail arc developed as a very faint & narrow trail. Pattern showed a full 180 dgr turn & formed in about 12 seconds. No obj visible. Crosses developed progressively with formation of the trail. Within 1/2 mile a second trail developed moving W to E in a straight line.		11. COMMENTS Nothing unusual about this; trails often seen with plane not visible due to high altitude.

To: Commander
Air Defence Command
Ent Air Force Base
Colorado Springs, Colo.

Time of observation: 1157 MST (1857 Greenwich)

Location: Cheyenne, Wyoming

Condition of sky: Scattered broken clouds in two strata at 8000 and 15000

Point of observed trails: Near the zenith.

Description: Vapor trail arc developed as a very faint and narrow trail. Pattern showed a full 180 degree turn and formed in about twelve seconds. No plane or object visible ahead of trail. Unusual pattern developed from what appeared to be vapor trails which developed at right angles to the arc as shown below. These crosses developed progressively with the formation of the trail but appeared wider than the trail itself. Within about a half minute a second trail developed moving from west to east in a straight line. The trails disappeared within five minutes.
