| 10. BRIEF SUMMARY OF SIGHTING<br>A very large, heart shaped object, burnished copper in color with a light under it/was sighted 30 dgr to 40 dgr above the horizon to the North. |  |                                                                                                                                                                                                                         |  | 11. COMMENTS<br>Some of the new WX balloons have lights attached to them. When seen at time given, they would have (will) look like different shades of red.<br>A balloon was probably released at Bridgeport, Conn. Airport just prior to reported sighting.                                                                                                                                                               |  |
