ATIC Comment!

Conflicting reports here, but Venus

now so bright that newspapers

are commenting on it was at almost

exact position (10° elos, 6w) given

in report here. also since this

is the place where the most publicises

UFO case in years (4 nov. 5.7) took

place mass suggestion due to the wide

rews paper publicity given that case a

few days ago - Cannot be ruled out.

Orob. ASTro (VONUS) with INF-luence)

From recent local case)
