into reports of UFO.

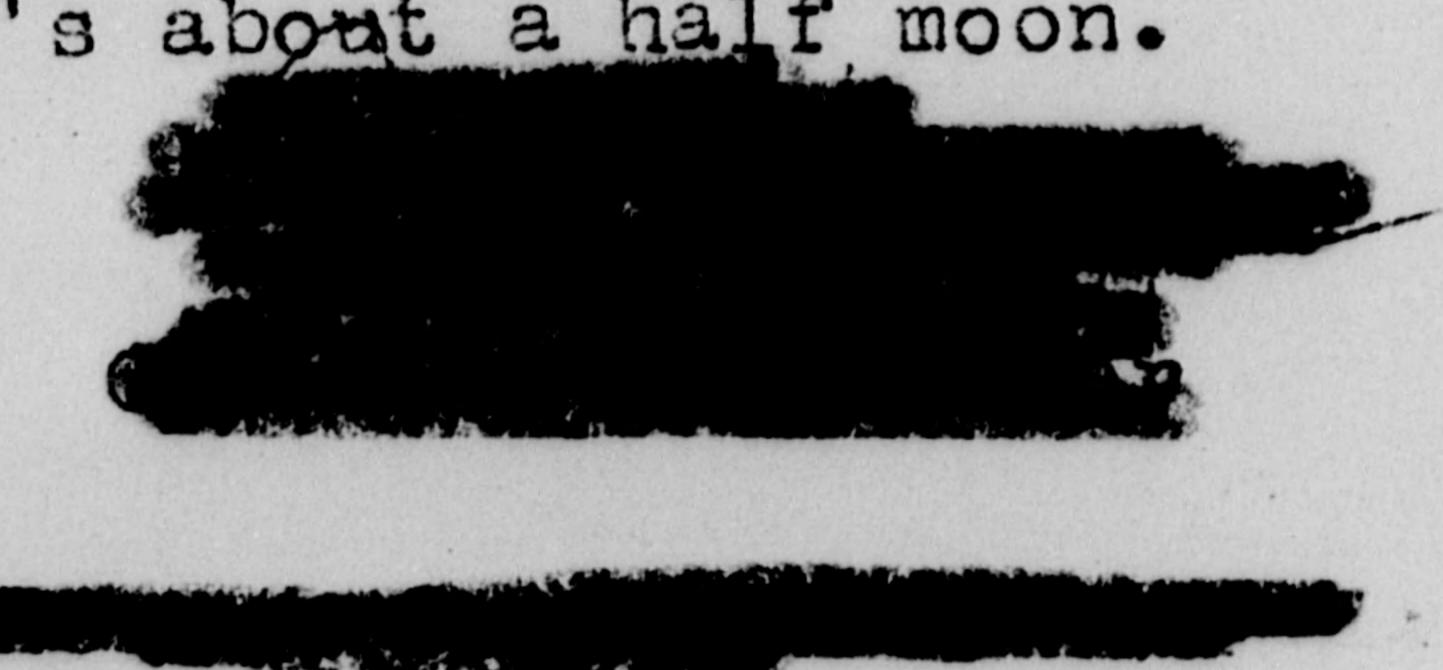

Dear Sir,

Please refer this letter to proper department, concerning inquiry into reports of UFO.

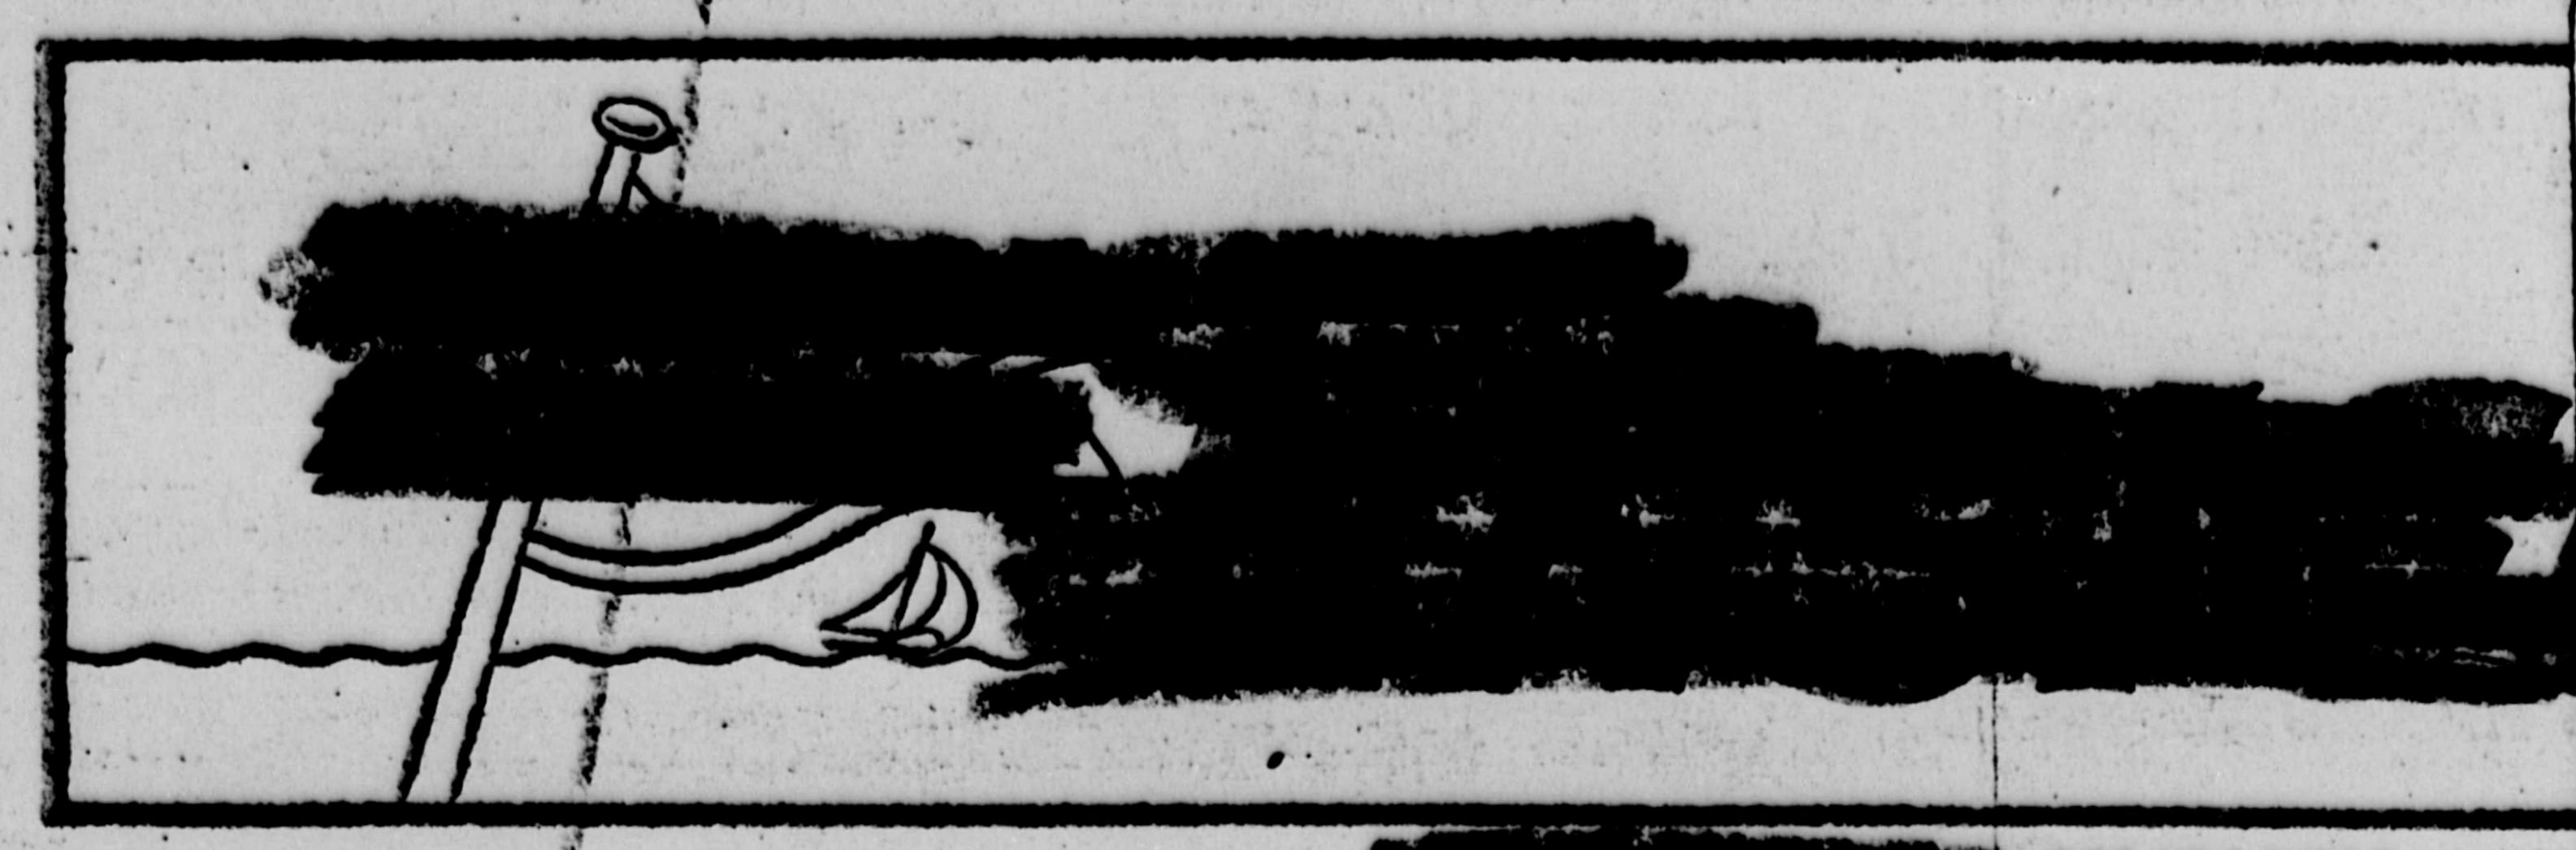

All pertinent information is in the story enclosed, in this week's issue of newspaper, and written by myself as a serious, observing newspaperman, not given to hysteria or illusions. Age good health, good eyesight. Perhaps you have a perfectly normal and logical explanation of what I saw at 10:30 p.m. Tuesday, Nov. 12. If so, would you please inform me.

The sketch below will give you an idea of the relative size of the object.

and direction of motion. There were no clouds nearby. The object was very clearly defined, not fuzzy, and almost perfectly straight. It's about a half moon.

WHATZIT THIS TIME

MEBBE THOSE RUSSIANS JUST MISSED THE MOON

No Sputnik this time, I hope. But it's sure a Whatzit!

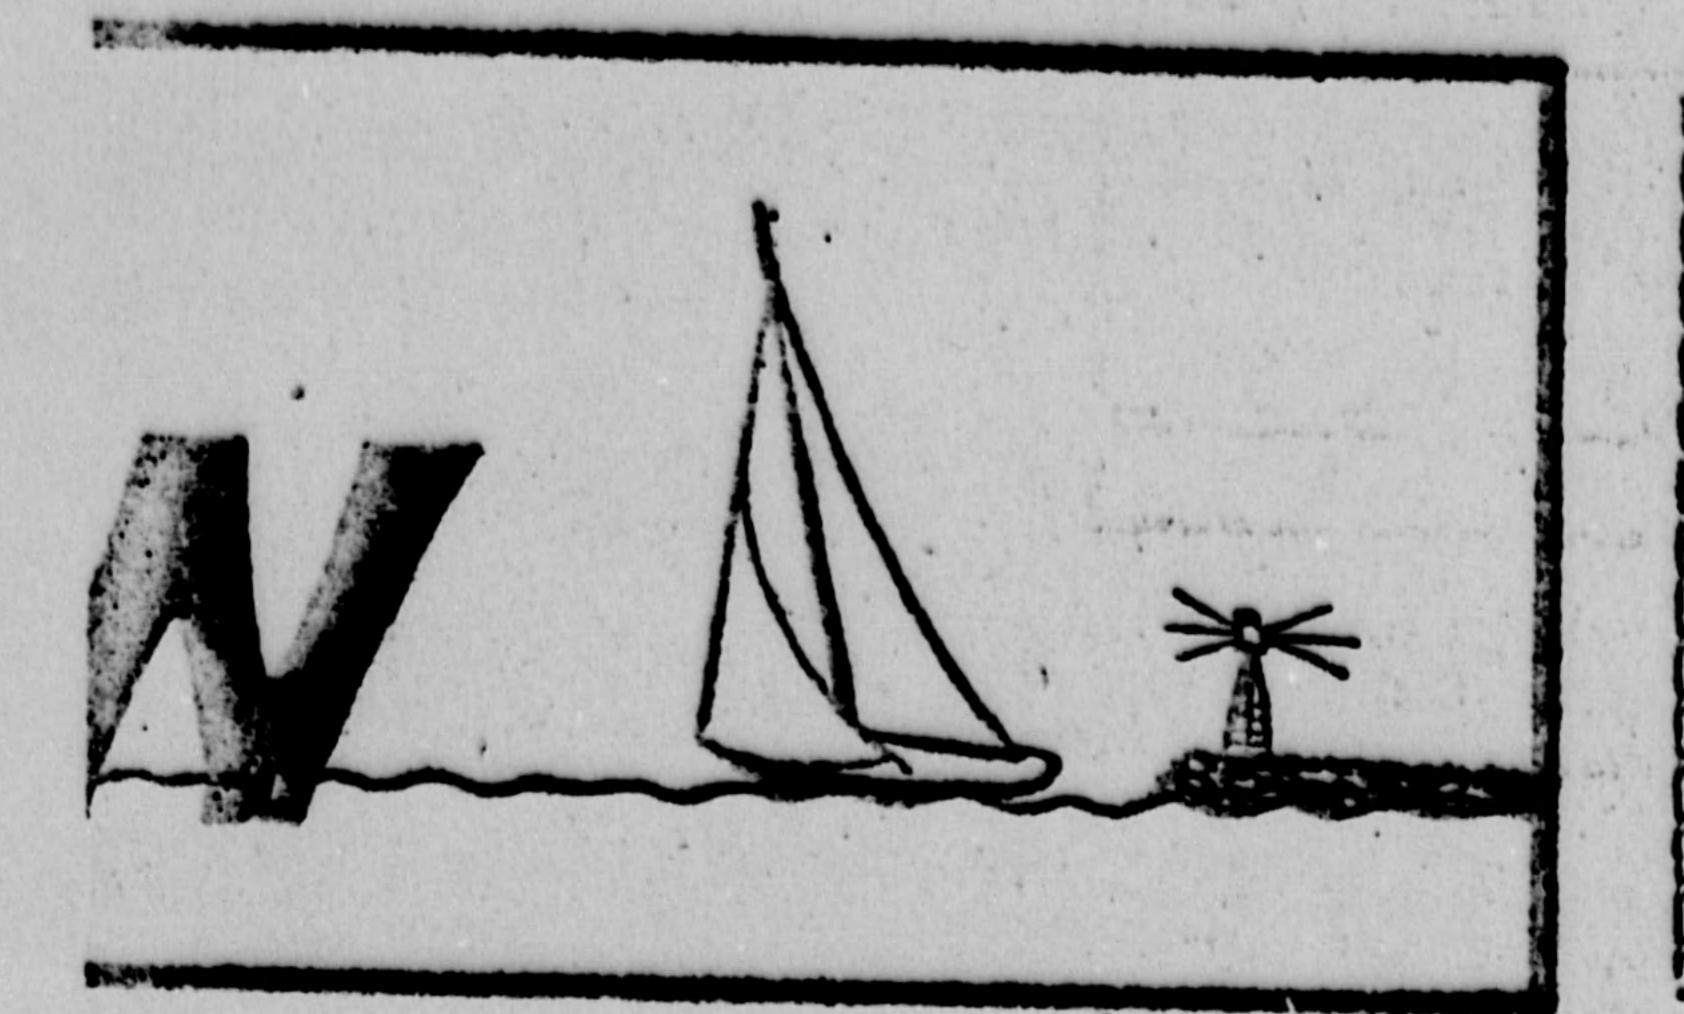

This eerie mystery object was sighted at 10:30 p.m. Tuesday, while was driving home from the Newport City Council meeting. I was driving almost due east, crossing the Upper Bay bridge toward Corona del Mar, and I glanced at the moon, which was low in the sky and just a little to the left of my direction of travel.

A long, narrow, black object, resembling a huge rope, or a finger of a tornado, passed across the face of the moon from left to right. It was several diameters of the moon in length, and inclined about 45 degrees to the right. It seemed to drift slowly without wavering, and it gradually disappeared in the darkness beyond the immediate light of the moon.

By then I had stopped the car, just on the easterly end of the bridge, and I was looking at the object through the open car door. My first impulse had been to brush at my eyes, then to check the windshield for some object. It was no optical illusion, no twig or branch of a tree or a telephone or power line. It was definitely something far away up there in the sky, drifting past the moon in a southerly direction.

I took care to check the time on the car clock, made note of the fact that I was wide awake and cold sober. Only possible aberration could come from an affliction known as "councilitis," which may result from some 6 hours of listening to city government at work.

That's the story. You name it.
