One object circular, a color white, no sound. ed to be one bright li landing light. It was in shape and was large than a star.	The object appear ght similar to not symmentrical	-elevation de the object s	fin	itely establish

ATIC FORM 329 (REV 26 SEP 52)

ATIC Conclusions:

The very good descriptions, against and particularly elevations green on the clys of — defently estillates the clanisty of the algo of I Verus.

This body was so built during the period that astro, grunds and 21.5, papers commented on I have any clothing clystopers recit as would, many clothing clystopers are in paints. (Press clyshop, the min paints the tile).

The following report of unidentified flying object was received by this headquarters from the individuals named below and reported in accordance with AFR 200-2:

- (1) Description of object
 - (a) Shape Circular
- (b) Size compared to a known object The witness reported the object as being 4 to 10 times the size of Venus, which would correspond roughly with the size of a pea.
 - (c) Color White
 - (d) Number One
 - (e) Formation if more than one N/A
- (f) Any discernable features or details The object appeared to be one bright light similar to a landing light. It was not symetrical in shape and was brighter than a star and also larger; however, it was not as large as the moon.
- (g) Tail, trail, or exhaust, including size of same compared to size of object None
 - (h) Sound None
- (i) Other pertinent or unusual features The object was stationary in the sky and appeared to brighten and dim without regularity.
- (2) Description of course of object
- (a) What first called the attention of the observers to the object The observers happened to glance out the window of their auto and saw the
 bright light.
- (b) Angle of elevation and azimuth of the object when first observed The angle of elevation was 20° and azimuth unknown. However, the sighting was toward the southwest from the point of observation.
- (c) Angle of elevation and azimuth of object upon disappearance The object remained stationary and in view the entire period while it was observed.
- (d) Description of flight path and maneuvers of object Stationary at all times.
- (e) Manner of disappearance of object The object remained in view during the entire period of observation.
- (f) Length of time in sight The object remained in sight for the full three to four minutes it was observed.
- (3) Manner of observation
 - (a) Ground visual
 - (b) No optical aids used
