1. DATE <u>28 Feb 58</u>	2. LOCATION <u>St. Lawrence Island, Alaska</u>		12. CONCLUSIONS ☐ Was Balloon ☐ Probably Balloon ☐ Possibly Balloon ☐ Was Aircraft ☐ Probably Aircraft ☐ Possibly Aircraft ☐ Was Astronomical ☐ Probably Astronomical ☐ Possibly Astronomical
3. DATE-TIME GROUP Local _____ GMT <u>28/1121Z</u>	4. TYPE OF OBSERVATION <u>thru binocs</u> ☒ Ground-Visual <u>7x50 BX</u> ☐ Air-Visual ☐ Ground-Radar ☐ Air-Intercept Radar		
5. PHOTOS ☐ Yes ☒ No	6. SOURCE <u>USAF Airman</u>		
7. LENGTH OF OBSERVATION <u>30 mins</u>	8. NUMBER OF OBJECTS <u>one</u>	9. COURSE <u>stationary 285 deg</u>	☒ Other <u>Prob ground lit</u> ☐ Insufficient Data for Evaluation ☐ Unknown
10. BRIEF SUMMARY OF SIGHTING U.S. WX, group observer saw a bright light, size of half dollar; close to the horizon. Observed for almost half hour. Rptd apparently because termination of line of sight was in USSR territory.		11. COMMENTS Plots of the area, plus requests for further data indicate that the light observed was, without doubt, on the observers island. The very low elev (2 deg fm the horizon), with the known high elevations tend to support this.

NO

REFERENCE PAR 14, AFR 200-2, DTD 5 FEBRUARY 58. THE FOLLOWING REPORT
IS SUBMITTED. A. DESCRIPTION OF THE OBJECT: (1) INITIALLY SEMI-
CIRCULAR, JAGGED ON TOP BECOMING MORE FLAT ON TOP. (2) ABOUT SIZE
OF A HALF DOLLAR. (3) WHITE LIGHT VARYING IN INTENSITY. (4) 1
OBJECT. (5) NOT APPLICABLE. (6) BASE OF LIGHT BRIGHTER THAN REST
OF OBJECT. (7) OBJECT APPEARED TO BE A GLOW FROM A LIGHT SOURCE.
(8) NONE. (9) NONE. B. DESCRIPTION OF COURSE OF OBJECT: (1) THE
OBSERVER OF THE OBJECT IS A WEATHER OBSERVER WHO WAS TAKING A 6
(6) HOURS WEATHER OBSERVATION. (2) NO ANGLE OF ELEVATION MADE.
AXIMUTH WAS APPROXIMATELY 285 DEGREES TRUE. (3) SAME AS 2 ABOVE.
(4) STATIONARY. (5) FADED OUT OF SIGHT AT SAME AXIMUTH. (6)
23 MINUTES. BRIGHTEST APPEARANCE WAS APPROXIMATELY 6 MINUTES
DECREASING IN INTENSITY. C. MANNER OF OBSERVATION: (1) GROUND
VISUAL. NOT ABLE TO PICK UP OBJECT RETURN ON FPS-3 RADAR. (2)
OBJECT WAS VIEWED FOR 10 MINUTES WITH M 15A1, 7 X 50 BINOCULARS.
(3) NOT APPLICABLE. D. TIME AND DATE OF SIGHTING: (1) 1121Z, 28
FEBRUARY 58. (2) NIGHT. E. LOCATION OF OBSERVER: 63 DEGREES AND 59
MINUTES WEST (NORTHEAST CAPE IN STRIP AT NORTHEAST CAPE, ST. 8

IDENTIFYING INFORMATION ON OBSERVER: (1) NOT APPLICABLE, (2) N DUGGAN, DAVID, A/2 C, DETACHMENT 15, 7 WEATHER GROUP, ATTACHED TO 712 ACW SQ, APO 714, SEATTLE, WASHINGTON. AIRMAN CONSIDERED RELIABLE. WEATHER AND WINDS: ALOFT AT TIME AND PLACE OF SIGHTINGS: (1) SEA LEVEL PRESSURE WAS 1024 MILIBARS. STATION PRESSURE WAS 29.584. TEMPERATURE WAS MINUS 6 DEGREES FAHRENHEIT. DUE POINT WAS MINUS 15 DEGREES FAHRENHEIT. ALTEMETER SETTING WAS 29.62. (2) WINDS: EAST NORTHEAST AT 8 KNOTS (0,6,0 DEGREES MAGNETIC) WINDS FOR HIGHER LEVELS ARE AVAILABLE AT 7 WEATHER GROUP, ELMENDORF AFB, ALASKA. (3) NO CEILING. (4) 20 MILES, (5) 1-10 CIRRUS STRATUS. (6) NO THUNDER STORMS. H. AT 1140Z HOUR, 28 FEBRUARY 58, THE BAROGRAPH CHART INDICATES AN INSTANT RAISE OF PRESSURE FROM 29.531 TO 29.599. FURTHER THE CHART AT 1435Z, 28 FEBRUARY 58 INDICATED AN INSTANT RAISE OF PRESSURE FROM 29.550 TO 29.560. I., OBSERVER CALLED THE OPERATIONS SECTION OF 712 ACW SQUADRON, WHO WAS UNABLE TO RECEIVE A RADAR RETURN FROM OBJECT. THE OPERATION SECTION CALLED ADDC AT CAMPION, ALASKA WHO ALERTED 11 AIR DIVISION AT LADD AFW, ALASKA. RECEIVED INSTRUCTION TO SUBMIT THIS REPORT. J. NONE. K. PREPARING OFFICER OF THIS DEPORT IS ACTING COMMANDER OF 712 ACW SQUADRON 5060 ACW SQUADRON, AAC AND ASSIGNED RADAR MAINTENANCE OFFICER. OBSERVER IS RELIABLE AND QUALIFIED OBSERVER OF WEATHER PHENOMINA. ANGLE OF AXIMUTH IS PROBABLE GOOD PLUS OR MINUS 15 DEGREES. A MORE ACCURATE AXIMUTH WILL BE DETERMINED BY USE OF TRANSIT IN RELATION TO MOUNTAIN AND OBJECT, WHICH WERE VERY CLOSE TOGETHER, UPON SUITABLE WEATHER CONDITIONS AT THIS STATION. TIME OF INSTANT RAISE IN PRESSURE IN FIRST CASE REPORTED EN H ABOVE COINCIDES WITH TIME DURING OBSERVER SIGHTING OBJECT. OBSERVER STATES THE USE OF THE BINOCULARS INDICATED TO HIM OF A GREAT DISTANCE OF THE OBJECT SINCE MAGNIFICATION DOES NOT HELP MUCH OVER THE NAKED EYE. HYPOTHESIS-- A LIGHT CREATED FROM A SOURCE SUCH AS AN EXPLOSION A CONSIDERABLE DISTANCE AWAY WEST OF THIS STATION CAUSING A RAISE IN PRESSURE AT THIS STATION. BAROGRAPH CHART FOR 28 FEB 58 FOR THIS STATION HAS BEEN SENT TO 7 WEATHER GROUP, ELMENDORF, ALASKA IN REGISTERED MAIL

(119) ST. LAWRENCE ISLAND

ELEVATIONS IN FEET

TENTATIVE ANALYSIS - St. Lawrence Island
UFO Sighting 28 Feb 58

Basic, Essential Data:

1. Semi-circular in shape; first jagged on top - latter smoothing off
2. Size: about half dollar. However, note: AS OBSERVED THRU 7 X 50 BINOCULARS! (Object was therefore 1/7 this size to naked eye.)
3. Stationary. No movement reported.
4. Almost one half hour in sight.
5. Direction (azimuth) from Ob. Pt. - approximately 285" (Rept, states could be plus or minus 15°)

Missing Essential Data:

1. Azimuth given - but no elevations. A line of sight plotted (Aero Chart #119, St. Lawrence, Island) from Northeast Cape (observer's point) splits the island almost length wise - and appears to terminate on USSR soil in the vicinity of the Gulf of Anadyrsky.
2. If the elevation is low - possible that it could have been some light or object on the island itself, as there are a few high points (although the conditions would normally ^{be} improbable)
3. If an elevation ^{the time of the year} was high - it could indicate unknown activities or operations taking place in the Gulf of Anadyrsky area.

Significant Points

1. The bright star Capella was in the exact line of sight given by the observer approximately 40°- 45° elevation (which was not given).
2. With binoculars (and the known characteristics of planets and stars observed at high latitudes) this star would appear unusual, particularly if observed through slight haze or fog. Note, that the object remained stationary for almost one half hour!
3. Although stationary for an exceptionally (for UFOs) long period. Neither of the two radar stations could pick it up.
4. Any explosion (leaving smoke, mushroom debris, etc.) would normally not remain suspended, with the same shape, for such a period of time.

CONCLUSIONS

On the basis of the limited data given, and pending receipt of further data, it is the opinion that the object observed probably was an astronomical body.

1. REF. ACW MESSAGE 12-AD-5C5 DTD 5 MAR 58, UFO SIGHTING FROM ST LAWRENCE ISLAND, ALASKA. PRELIMINARY ANALYSIS BASED ON LIMITED DATA GIVEN: SHOW FOLLOWING SIGNIFICANT POINTS:

a. OBJECT IN SIGHT FOR ALMOST HALF HOUR, NO MOVEMENT. YET NEITHER OF TWO RADAR STATIONS COULD PICK UP.

b. PLOT OF LINE OF SIGHT (AZIMUTH 285 DEGREES) CUTS ISLAND ALMOST IN TWO LENGTH WISE, AND IF CONTINUED TO USSR TERRITORY APPEARS TO TERMINATE IN GULF OF ANADYRSKY AREA, VICINITY OF MYS CHAPLINA.

c. ESSENTIAL DATA, ANGLE OF ELEVATION MISSING. IF LOW ANGLE, LIGHT OBSERVED COULD BE FROM ANY POINT ON ISLAND OR ITS

WESTERN SHORES. IF HIGH ANGLE, POSSIBILITY OF UNKNOWN SOVIET ACTIVITIES OR OPERATIONS MAY BE CONSIDERED.

d. REUR HYPOTHESIS: HIGHLY UNLIKELY THAT ANY SMOKE, MUSHROOM CLOUD, ETC. RESULTING FROM AN EXPLOSION WOULD REMAIN IN SAME POSITION, WITHOUT CHANGE IN SHAPE FOR ALMOST ONE HALF HOUR.

2. SIGNIFICANT TO POINT OUT THAT BRIGHT STAR CAPELLA IN ALMOST EXACT AZIMUTH GIVEN BY OBSERVER, AT ABOUT 40 TO 50 DEGREES ELEVATION. UNUSUAL APPEARANCE OF CELESTIAL BODIES OBSERVED IN ARCTIC REGIONS, AND ESPECIALLY IF OBSERVED THROUGH BINOCULARS IN DARK WELL KNOWN TO UFO ANALYSTS, PARTICULARLY IF ANY HAZE, FOG, ETC. EXISTS BETWEEN OBSERVER AND OBJECT.

3. REQUEST ACTION BE TAKEN IN ACCORDANCE WITH PARAGRAPH 4b AND 6b, AFR 200-2, AND THE RESULTS MADE KNOWN TO THIS CENTER.
