CONCLUSIONS ☐ Was Balloon ☐ Probably Balloon ☐ Possibly Balloon ☐ Was Aircraft ☐ Probably Aircraft ☐ Possibly Aircraft ☒ Was Astronomical Meteor ☐ Probably Astronomical ☐ Possibly Astronomical ☐ Other _____ ☐ Insufficient Data for Evaluation ☐ Unknown	
3. DATE-TIME GROUP Local <u>1227</u> GMT <u>29/2027Z</u>		4. TYPE OF OBSERVATION ☒ Ground-Visual ☐ Ground-Radar ☒ Air-Visual ☐ Air-Intercept Radar			
5. PHOTOS ☐ Yes ☒ No		6. SOURCE <u>Military & Civilian</u>			
7. LENGTH OF OBSERVATION <u>few secs</u>		8. NUMBER OF OBJECTS <u>Several</u>		COURSE <u>Variable</u>	
10. BRIEF SUMMARY OF SIGHTING <u>Several A/C crews & ground observers saw a meteor-like obj for a very short duration fm several locations.</u>				11. COMMENTS <u>It appears in all cases, a flaming obj was sighted almost simultaneously by persons within a 355 mile radius. This indicates the obj was at a very high alt. On basis of info rptd, obj was a fireball(bolide). Evaluated meteor by Dr. C.T. Elvey of Univ Alaska at collection point.</u>	

PAGE THREE RJKDAG 20

ING FROM UPPER RIGHT TO LOWER LEFT, ALMOST VERTICAL PATH. ORIGINALLY
STREAK OF SMOKE AND YELLOWISH FLAME, THEN BURST IN BRIGHT BLUE BALL.
OBJECT APPEARED BETWEEN 20 AND 10 DEGREES ABOVE HORIZON. VISIBLE
ONE TO TWO SECONDS. PART SIX: CAPT HUBERT E CHANDY, 44144A, 774
INCOOP CARRIER SQUADRON, ARLING, OKLA, PRESENTLY EIELSON AFB, ALASKA,
AT 1000 AT 23,000 FEET, POSITION DLIA 1923, 40 TO 45 MILES BEHIND
AIRCRAFT IN PART FIVE ABOVE, ALONG WITH COPILOT, ENGINEER AND
NAVIGATOR, SAW OBJECT LIKE METEOR ABOUT 5 DEGREES RIGHT OF TRUE
COURSE TO WHITEHORSE RADIO RANGE, ABOUT 10 DEGREES RIGHT OF CONTRAIL
AND 1000 FEET AHEAD. OBJECT TRAVELING ALMOST VERTICALLY FROM 20 DEGREES
TO 10 DEGREES ABOVE HORIZON. YELLOWISH STREAK ENDING IN WHAT
APPEARED TO BE BLUEISH EXPLOSION, LIKE ARC WELDING LIGHT. OBJECT
LIKE METEOR, BUT NEVER SAW ONE IN DAYLIGHT BEFORE. VISIBLE ONE
TO TWO SECONDS. PART SEVEN: [REDACTED], IN AERO COMMANDER
1352 OF SAFEWAY AIRWAYS, ANCHORAGE, ALASKA ON AMER 2 AIRWAYS,
23,000 FEET, POSITION DLNA 2002, MAGNETIC HEADING 240 DEGREES,
SAW OBJECT FALLING IN FRONT OF HIM COMING TOWARDS HIM, BRIGHT
ORANGE, WENT INTO OVERCAST AT 9000 FEET ABOUT 20 MILES AHEAD OF
HIM, VERTICAL DESCENT. VISIBLE ONE TO TWO SECONDS. PART EIGHT:
WHITEHORSE CONTROL TOWER CLCA 5544 SIGHTED BRILLIANT WHITE OBJECT,

THIS MESSAGE IS IN 16 PARTS. SECTION 1 OF 2.
PART ONE: A METEOR-LIKE OBJECT WAS SEEN OR HEARD BY AT LEAST
OBSERVERS AT 2027/29Z IN EASTERN ALASKA AND THE GENERAL AREA
OF WHITENORSE, YUKON TERRITORY, CANADA. ALASKAN AIR COMMAND AND
THE GEOPHYSICAL INSTITUTE, UNIVERSITY OF ALASKA EVALUATE THE
OBJECT AS AN UNUSUALLY LARGE METEOR. THOUGH THIS IS A PRELIMINARY
EVALUATION REMOVES THE REPORTS FROM UFO CATEGORY (APP 200-2).
OF GREAT INTEREST IN POSSIBLE RE-ENTRY OF EARTH SATELLITE INTO
ATMOSPHERE PROMPTS SUBMISSION OF FOLLOWING REPORTS FOR ANALYSIS

Classification Cancelled
OR Changed to UNCL

PART TWO: [REDACTED], ANCHORAGE, FLYING CESSNA
[REDACTED], HASTBOUND 3,500 FEET, POSITION DLIC 3636, SIGHTED REDDISH
OBJECT FALLING NORTH TO SOUTH APPROXIMATELY 10 TO 15 DEGREES FROM
VERTICAL. NO VAPOR TRAIL. DIRECTION APPROXIMATELY 100 DEGREES

W. VISIBLE TWO SECONDS. PART THREE: [REDACTED], FLYING
APPROACH TO HAINES, ALASKA, POSITION OKAP 5451, OBSERVED BLINDING
WHITE OBJECT 350 DEGREES TRUE FROM HAINES RADIO BEACON. APPEARED
ABOUT 30 DEGREES ABOVE HORIZON TRAVELING VERTICALLY DOWN AND
DISAPPEARED 10 DEGREES ABOVE HORIZON. VISIBLE ONE TO TWO SECONDS.

PART FOUR: CAPT. [REDACTED] AND COPILOT [REDACTED] ALASKA
[REDACTED] 101, FROM 5,000 FEET, POSITION DLIC 3538, SAW OBJECT
DIRECTLY AHEAD ON 335 DEGREES MAGNETIC, TRAVELING STRAIGHT
DOWN, PASSING OUT OF SIGHT BELOW HORIZON. PLANE TO OR BEHIND
HORIZON, LEAVING TRAIL OF WHITE SMOKE. SPEED SIMILAR TO COAST.

SEEMED TO HAVE SHORT STUBBY WINGS. THIS REPORT MADE AT SAME
TIME AS PART THREE. OBJECT IN SIGHT ONE TO TWO SECONDS. PART FIVE:
CAPT. [REDACTED] USAF, 774 TROOP CARRIER SQUADRON, ANCHORAGE, OKLA, NOW
HAILSON AFB, ALASKA, FROM 25,000 FEET [REDACTED] POSITION DLBA
107, AIRCRAFT C 100, SIGHTED BRIGHT OBJECT DIRECTLY IN FRONT--
ABOUT 5 DEGREES TO RIGHT OF COURSE TO WHITEROSE RANGE--TRAVEL--

True direction

See Dr. Oliver's

Rept No. 1021 on

Fireballs and Meteor Trails

PAGE FOUR RJKDAG 2Y
SPECIALLY REDDISH, AT FIRST LIKE WILDING TORCH, TO NW 314 DEGREES
MAGNETIC, FALLING UPPER RIGHT TO LOWER LEFT 15 DEGREES FROM VERTICAL.
LEFT WHITE VAPOR TRAIL VISIBLE FOR ABOUT 3 MINUTES. PART NINE:
[REDACTED] TELEPHONE OPERATOR AT CANYON CREEK [REDACTED]
REPORTED THAT SOME SEVEN PEOPLE AT HIS LOCATION REPORTED HEARING
SERIES OF SHARP REPORTS LASTING TWO TO FIVE SECONDS, LIKE
MACHINE GUN AT ABOUT 2030Z, AND SAW VAPOR TRAIL AND PUFF OF
SMOKE TO N AND NE. SMOKE WAS ABOUT 45 DEGREES ABOVE HORIZON.
PART TEN: UNIDENTIFIED, REPORTED BY RAPCON,
PEOPLE AT CHAMPAGNE, CLPA 3248, REPORTED HEARING WHISTLING
SOUNDS LIKE JET, BUT FASTER, GOING EAST TO WEST AND ALSO REPORTED
HEARING SERIES OF EXPOSOSIONS. NOTHING SIGHTED. OCCURED ABOUT
2030Z. PART ELEVEN: UNIDENTIFIED, REPORTED BY RAPCON, PEOPLE
AT LOGJAK BRIDGE, CLLB 1540, REPORTED ORANGE TO BRIGHT RED
OBJECT VISIBLE ONE SECOND, 35 DEGREES ABOVE HORIZON AT 119
DEGREES TRUE. SMOKE SEEN FOR FOUR TO FIVE MINUTES AFTERWARDS.
PART TWELVE: OBSERVER ON 200 TO 400 FOOT HILL ABOUT FOUR MILES
SO OF AISHIHIK, CLNB 3342, HEARD EXPLOSION TWO TO FIVE SECONDS
AFTER HEARING WHISTLING NOISES. DURATION ABOUT TEN SECONDS.
MIGHT HAVE BEEN ECHOES. SOUNDED LIKE NORTHERLY DIRECTION. NO

Duration

PAGE FIVE RJKDAG 20
USUAL SIGHTING. OCCURRED AT 2330Z. PART THIRTEEN: AISHINIK,
LINE 3235. PEOPLE REPORTED TO HAVE HEARD EXPLOSIONS "NEARBY"
AT 2327Z, DURATION ONE TO THREE SECONDS NO VISIBLE EVIDENCE.
ANOTHER REPORT STATES PEOPLE THIS LOCATION HEARD WHISTLING
SOUNDS TWO TO THREE SECONDS ABOUT 2330Z. THIRD REPORT STATES
BLUE CLOUD OF SMOKE, STATIONARY OVERHEAD AND EXPANDING ABOUT
2330Z. PART FOURTEEN: REPORTED THROUGH CAA THAT NINE PEOPLE ON
GROUND AT WHITEHORSE HEARD EXPLOSION AND SOME SAW RED FLASH
ONE SECOND TO NW AT ABOUT 2330Z AND CREW OF COMET AIRCRAFT
WHICH LANDED ABOUT 2330Z AT WHITEHORSE REPORTED SEEING (RED)
FLASH AND HEARING EXPLOSION. PART FIFTEEN: DR. [REDACTED]
AND DR. J. [REDACTED] OF GEOPHYSICAL INSTITUTE, UNIVERSITY OF
ALASKA, PRESENT THROUGHOUT COLLECTION OF INFORMATION AND
PARTICIPATED IN COLLECTION AND ANALYSIS BY 11 ADIV, LADD AFB
INTELLIGENCE PERSONNEL. FOLLOWING SUBMITTED AS ASSESSMENT BY
11 ADIV AND GEOPHYSICAL INSTITUTE: 1. BELIEVED TO BE A
METEOR ENTERING ATMOSPHERE AT HIGH ANGLE APPROXIMATELY TEN TO
FIFTEEN DEGREES FROM VERTICAL, TRAVELING GENERALLY N TO S.

USAF ATTN: ACS/58 AND ISO. REFERENCE MESSAGE THIS HEADQUARTERS
53030, 29 MARCH, PART FOUR ON METEOR-LIKE OBJECT. CAPTAIN [REDACTED],
ALASKA AIR LINES PILOT, HAS RETRACTED HIS STATEMENT THAT OBJECT
HAD SHORT STUBBY WINGS. CHANGE OF OPINION MAY BE PARTIALLY DUE TO
CONVERSATIONS CAHTAIN [REDACTED] HAD WITH SEVERAL OTHER PILOTS WHO
ALSO OBSERVED METEOR-LIKE OBJECT. PRIOR TO RETRACTION HE HAD
SLIGHTLY AMPLIFIED HIS ORIGINAL STATEMENT AS FOLLOWS "FIRST THROUGH
OBJECT WAS A PARACHUTE FLARE WHICH FAILED TO OPEN. SECTION THOUGHT
APPEARED LIKE F-104 WING."

Note!

FLASH REPORT

Memo for Capt. Gregory: *AFCIN-4E4*

Reference is made to the telephone call from Capt. Nelson, SDO, Saturday night, 29 March 58, regarding the report of 4 sightings received from Major Leonard, NORAD. The call was made because Major Leonard felt that the sightings may have been Sputnik II. Capt. Miatch came to the Center and analyzed them from the standpoint of predicted Sputnik II tracks and advised Major Leonard by phone that he did not believe the sightings to be the Soviet satellite. He requested that NORAD re-interrogate the reporters of these sightings and forward the additional information to ATIC as normal UFO reports.

The data taken from Major Leonard by me are as follows:

- Sighting 1 - *✓* Flaming object vicinity of Northway, Alaska; heading 90^{*} degrees; 10 degrees above the horizon; time: 292025Z - 292029Z.
- Sighting 2 - *✓* Flaming object reported by acft 40 miles southeast of Haines, Alaska; 30 degrees above the horizon; time: 292027Z.
- Sighting 3 - Vertical fire at 30,000 ft reported by ~~aircraft~~ *over* White Horse, Yukon and the tower operator there; time: 292027Z.
- Sighting 4 - *✓* Flaming object reported by aircraft vicinity of Watson Lake, Yukon; time: 292027Z.

These were all the data Major Leonard had from the persons reporting the sightings as of the time he talked to me.

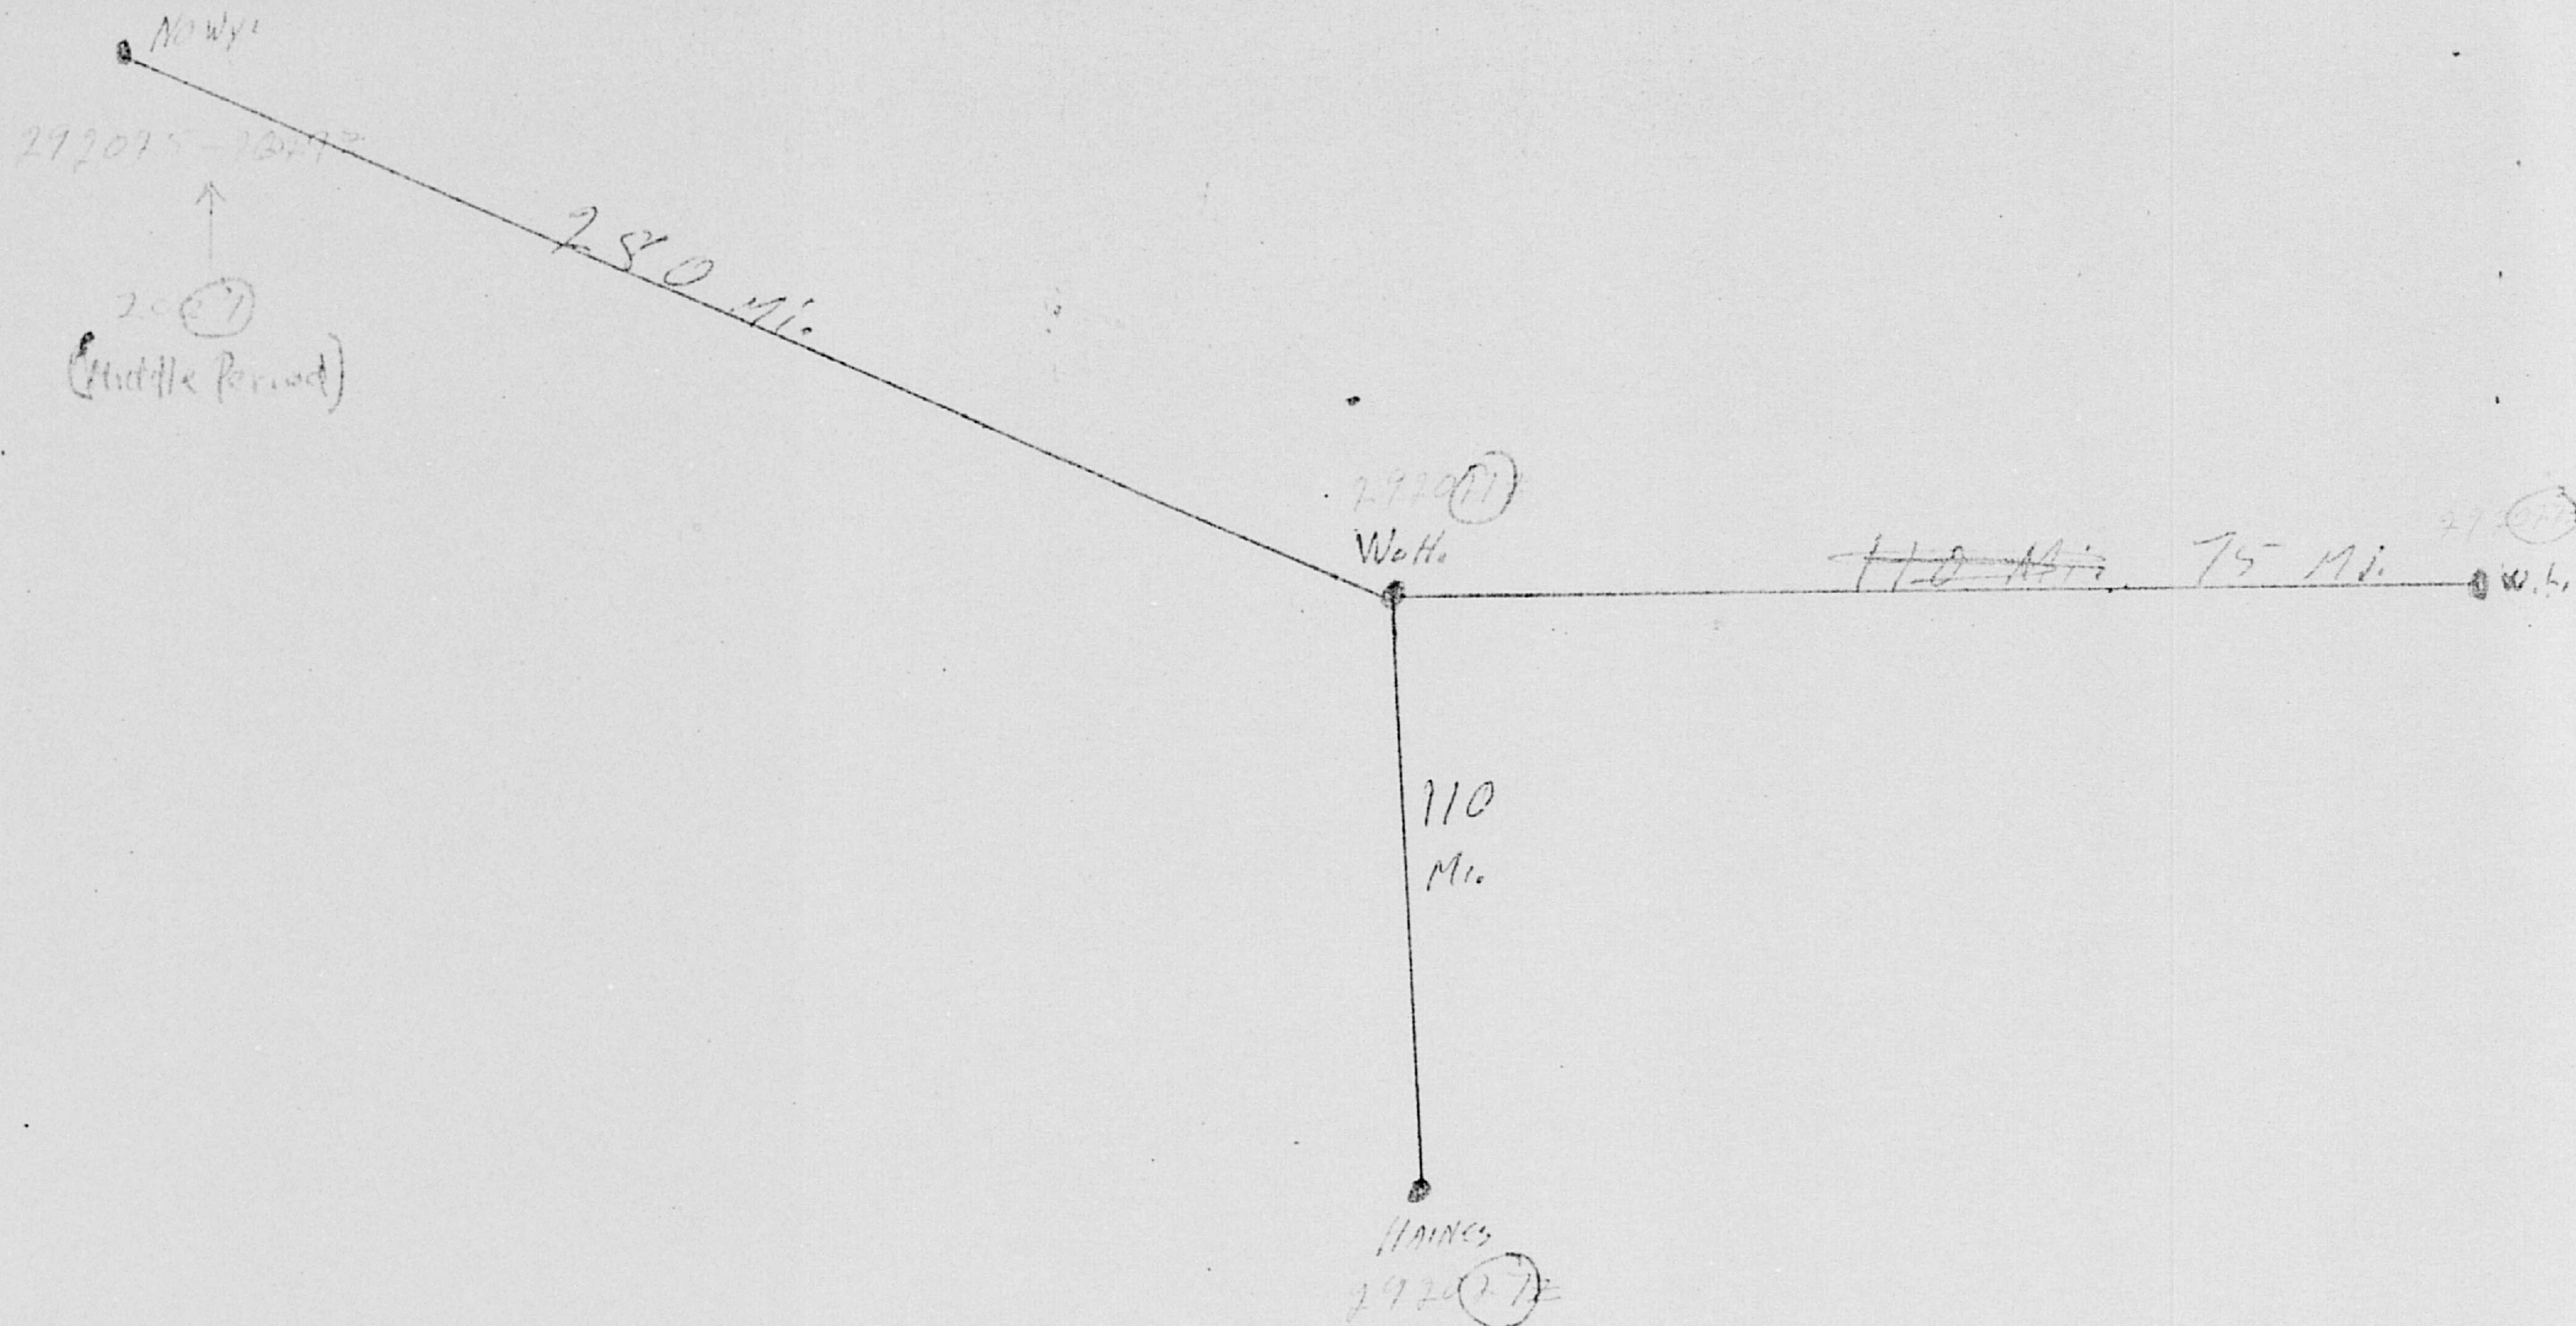

H. D. Nelson
H. D. NELSON
Capt, USAF
Staff Duty Officer

Flash Evaluation, pending receipt of complete report:

1. It appears that, in all cases, there was a flaming object.
2. The object was sighted almost simultaneously by persons within a 355 mile area at 2027Z! This indicates that the object was very high ^{approx} and moving somewhat in the order of 16-17 miles per second.*
3. Allowing for the known tendency and inability of many persons to closely estimate directions, elevations, angles, etc ^{even}

It appears that the object (on the basis of info here) was traveling generally E to W.*

Conclusions: On basis of above, and from data given, obj. was a bolide.

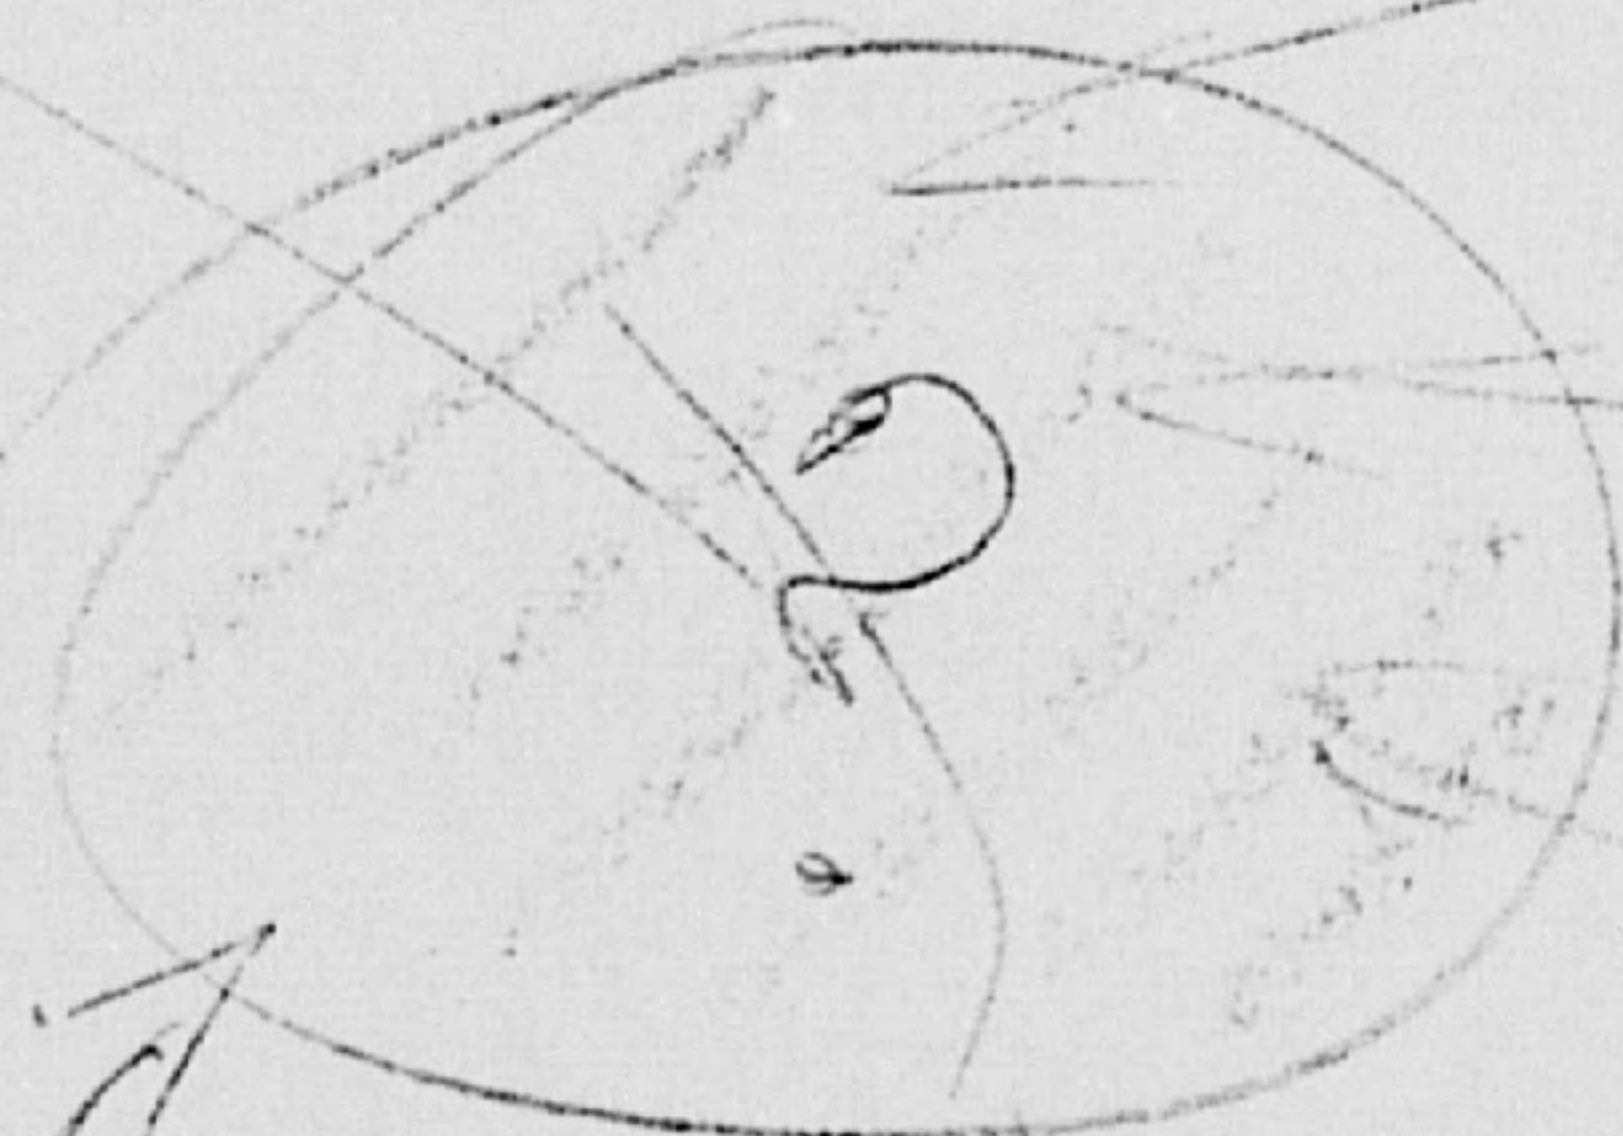

Brief Summary

1. Observed almost simultaneously at 2027 by number of persons within a 350 mile area
2. Majority state object flaming, abov very brilliant.
3. Sighting duration averages about 3-7 seconds.*
- 4.

* This would rule out possibility of spectral as it indicates

1st 01/11/11

Probable
area of fall
or return

See also Chart #117

(Wrangell Mountains)

CL - (Area NC-PC,
NB + PB)

(See * Below) Direction of Obj. at (Morse - Direction)
 1st Sighting - (a/c) Generally North to South (2027)
 — Approx 100 degrees (EAST) *
 (E)

2nd Sighting - (a/c) Direction of Travel
 Not given - but seen in
 vertical dive at approx 350°
 from Hanes Radio Beacon (W)

3rd Sighting (a/c (MAG) 305° - (30 approx variation) = 275° True
 (Seen in this direction - not a direction
 of travel) Seen in gen. vertical
 dive. (W)

4th Sighting - (a/c) - Observed in westerly direction -
 describing an arc from upper right
 to lower left (W)

5th Sighting - (a/c was 1000 miles
 behind 4th sighting
 a/c, W. Bomb) - Meteor-like object - observed
 slightly to right of course (i.e. WSW)
 - Vertical arc downwards (W)

6th Sighting - (a/c) appearing SSW - appeared in front of
 a/c and - vertical
 descent. (SW)

7th Sighting (ground ant. 2000 miles) - observed obj. in SSW -
 in vertical descent. (SW)

* First observer was considerably to the West of the other
 observers who noted obj. in the West. This indicates obj. came
 down in an arc between the two. Prob. NB-NB - PC-PB Quadrant

Ref your report of unusual meteor-like object observed by numerous A/C and ground observers in general area between Tazlina, Alaska and Watson Lake, Canada. Cite TT Msg INT-1, 53030, Sec 1 & 2, dtd 30 Mar 58. Taking into consideration the known tendency and inability of many observers to give precise azimuths, elevations, directions and other angular measurements, particularly if started or due to suddenness of phenomena, the following are considered firm: (a) Object was seen practically simultaneously at 2027Z by all observers located within a 250 mile area, (b) All

observers except first, report object in W to SW, and generally in descent. First observer considerably West of others reported object in East. This places possible locale of impact, if any, in GEOREF area, NC-NB and DC-PB, ~~A-117~~ Chart No. 117, (c) Characteristics, descriptions and other data given indicates object was true bolide, a specie of meteorite called "fireball", (d) This is further confirmed by the fact the velocity appears to be considerably above that of any artificial satellite re-entry velocity, derived from the average sighting directions, a fact also commented in your msg., (e) Other significant clues for "fireballs" seen in daylight: trail of white smoke; change of colors during flight; crackling and whistling noises, and explosion into fragments. (Ref Dr. C.P. Olivier's work on fireballs, U. of Penn., Rpt Nr. 102). On the basis of the brief information submitted, there is no compelling reason to conclude
