ATTC Comment: Repeatedly
proven over 12 years that
balloons seen near dusk or
dawn will glow orange-red-
cherry red - maroon in color -
due to the slant rays of the
of the sun. This would then
suggest a balloon. However,
it must be placed in INSUFF
DATA category: Cannot evaluate
with most info, data missing.
P, E, Size, shape, dimensions, location,
azimuth, angles, etc. (only that
a bright red light seen near horizon!)
