g. Weather - unknown.

h. General: Observer awakened husband, but object was gone before he could see it. Observer waited for public news regarding object - but heard none by time she reported it to the Air Force at 0850 hours local. She knows of no other witnesses. Mr commenced report then gave telephone to wife for details. Both parties were coherent, cooperative, and concerned regarding value of information to the Air Force. Telephone obviously was being monitored on rural party line. No attempt was made to withold names; on location investigation was solicited.

CHF, CC

Sille C. Director of Administrative Services

1. The observer compares the size of the vasici to that of the rising sun at 14 mile distance. If this was true, everyone in the surrounding country would have seen it and reported it.

1. There are no elevations, azimuthe or directions of travel given.

3. a Objectives seen "less than one minute"

Insuff forly pending further data

Omaha World Herald 13 August 1958

Glowing Light in Night Sky Definitely Wasn't Satellite

A Lincoln resident and two Omahans reported seeing an umusual bright light in the sky about 3:30 a.m. Tuesday.

No explanation was apparent immediately. "It could not have been a satellite," said Lynn Anspaugh, acting observer in charge of the Moonwatch station at Nebraska Wesleyan University at Lincoln.

The only remaining Russian satellite in the sky passed over the Lincoln area about 11 p.m. The American Explorer is passing over the area during the day, is not visible to ground observers, he said.

The Sputnik III will pass just west of Lincoln at 10:39 p.m. Wednesday and about 10:24 Thursday, he added.

Tuesday's reports came from:

traveling southwest at 3:28 a.m. He said it was "a bluish white, intensely brilliant oval with a very short yellow-red tail, appearing to be about half the size of the moon."

South Eleventh Street, at about 3:30 a.m. He called it "a blue flame as big as a basket ball, traveling straight west."

- Mrs.

, who happened to be awake and glanced out a window about 3:25 or 3:30. She said she the impression of a "flash," then a glowing green object traveling north, then turning west.

"It was bigger than a star," she said.

SUBJUCT: UFO Incident in Lincoln and Om ha, Tebruska

TO:

Comander

Air Technical Intelligence Center

ATTILL AFCII 4E4

Wright-Fatterson Air Force Base, Ohio

- 1. Reference message from AFCIN-4E4 9-1994-E, 02/1616Z Sep 50.
- 2. M/Sgt Jerrol R. Clark, AF 16003931, of Detachment 2, 1005th AISS, Richards-Gebaur Air Force Base, Missouri investigated this incident 4 Sep 58 with the following results:
- Beebeetown, Iowa, has subsequently moved to Street, Golden, Colorado, phone and was not interviewed. Her daughter, living in Beebeetown, was interviewed but could add little to what was already known. Residents of Beebeetown who were contacted had no knowledge of the object nor had they heard that one had been sighted.
- b. Local residents spoke highly of Mrs. and wore all of the opinion that she was a level-headed person and not of an excitable nature. The police of Missouri Valley, Iowa, about 7 miles forthwest of Beebeetown, had no knowledge of the sighting, nor did they know the Source.
- area of Beebeetown. According to Source's daughter, hrs. Hiller was not awakened by the light as the PMM states, but rather that she was unable to sleep and was sitting up in bed when she first noticed the light at point "X". It (the light) proceeded to point "Z" along the top of the hill "B" at a supposedly low altitude on a general Northeast to Southwest course. The interviewer could not ascertain if a sound accompanied the light nor if it actually disappeared behind the trees or disappeared in the distance.
- 3. Attached as inclosure 2 is a report of weather conditions at Offutt AFB on 12 August 1958.
