j. [REDACTED] CAA at Windsor Locks, Conn. Reports No aircraft in the area during the time period.

k. Staff Intelligence Officer 99th Bomb Wing, Major Robert F. Nelson. This report is supplementing 99DOI message 5932 Dated 02/1445Z. It is doubtful if any connection exists between this sighting and the aircrow/AC&W sighting; However the proximity of times and locale of observation warranted at least a cursory investigation. Mr. [REDACTED] was interviewed at his home at 1930 hrs 1 Oct 1958. During the interview he produced a sketch he made of the object after arriving home within 15 minutes of the sighting. He stated that he at first thought it was a jet aircraft in trouble and this prompted him to call Westover AFB, Mass; However the telephone operator connected him with the local newspaper, which is how I first became aware of the sighting. Mr. [REDACTED] is a technical artist by trade, has flown light aircraft, wears thick bifocal glasses and appeared to be a reasonably calm person. He and his wife recalled that while travelling by car through New Mexico in 1949 they had observed a similar object but had not reported it for fear of ridicule through publicity. The sketch and 1ea. 4" x 5" & 35 MM Color transparency are attached as inclosures. Coordinates and azimuth information in this report were plotted on U.S. Air Target Chart SO310-9941-100, 2ND Ed Feb 1956. No further comment or explanation referencing this sighting is available.
